Thanks

Usually about 3 weeks. The encryption is maintained by the coder, not a 3rd party crypter. The file you exploit with needs to be crypted though.

A lot of people seem to be asking if macrosploit works as a "crypter" for their exe file. So, im saying NO now. You must crypt your exe before building. It will get detected upon execution and removed by antivirus.

I am working to resolve the issue, but..

Posting he will only dieter me from replying. I am not going to provide a back and forth support service through my sales thread.

There is even a direct contacts page: <https://macrosploit.com/contact.php>

use it.
