Shell is a multinational, multi billion dollar company, they ain't gonna end their promotion until it says its going to end. It's not something that can really be 'patched' without them completely ending it.

Either way I'm selling it for personal use. People are selling codes for \$20 a pop, I'll give you the method for the less than 3 of them. It just makes sense.

/just to be clear I'm not going to argue back and forth with y'all. I'm selling it, it is what it is.

Yea, like say you create 10 codes today those ten will be ready in 24-72 hours. If you created ten

tomorrow they would be ready 24-72 hours after you created them. Startup is like nothing lol

I can't control if you post the method and screw it up. Now welcome to my ignore list.

What I've sold is completely legit and is working as of this moment. I suggest everyone who has bought it to chug along and make some codes for yourself. All you need to do is make like 3 codes and the method pays for itself.

Just as a precautionary, if this tard or anyone else post it publicly that it may get patched sooner rather than later, but its unlikely they will post it.

Either you don't know method or your plain stupid. Shell doesn't need to end the ref program for it to patch. Literally if they fix the MC on step 3 then it's patched. All it takes is for them to actually verify the MC on step 3 and it's over.

EDIT: if people keep selling this I'm just gonna post that shit for free

No doubt.

No one will leak it on HF, its MAD (mutually assured destruction). I'm limiting how many can purchase and I implore anyone else selling the method to as well. An extra 100 people doing it won't raise suspicion by Shell, now an extra 5,000 maybe an issue.

Nope.

If we were talking about Joe Shmoes local owned store then yes. But no, shell will not notice even 100 more people doing this. If someone posts this to the public (which they wont because it definitely would mean MAD mutually assured destruction), then sure they would probably patch it eventually.

On a side note, sleep renewed my passion to sell the method so that is true. After cleaning out my PMs for a third time I think im finally up to date.

While for some reason PayPal is letting me recieve payments they aren't letting me do anything with the money (even though I'm not limited) therefore I'm only allowing cryptos!

Vouch for this product. I sell gas at work to all my co workers for \$1.50 a gallon it's awesome I bought a giant drum I put gas into and then sell it off the next day. I end up hitting 5-10 different shells when I do this. Good profit if you do it right. Very easy concept to follow for the average individual. Would recommend if you need gas

Been almost 72 hours

Wilds - January 24, 2018, 4:15 pm

Well ben, if these codes don't start working in the next day or 2, you're going to have a big problem on your hands.

You'll have many many angry customers. And I would think that you (as someone conducting a business) would try and avoid that by temporarily stopping sales to confirm that the method is still working. Because you have no way of knowing if it was patched, or if it's just taking longer. All of my previous codes before yesterday got their balance 40-48 hours after their creation like clockwork. It was never any different.

You realize it is very suspicious to drop your price from \$50 to \$15 in a "flash sale" immediately after the first complaints of the method no longer working, correct? Even if you changed your price frequently. It is very suspicious within an hour of seeing all the complaints to lower the price. To everyone but you, it looks like you are trying to sell as many as possible, because you know it no longer works.

For the sake of your reputation as a seller, I would think you would rather take being trusted for many years, over making a few bucks when the method stops working.

Ben Shapiro - January 24, 2018, 4:17 pm

HOLY FUCK. Annoying ass kids.

Percyi - January 24, 2018, 4:18 pm

The buyers were advised that the method could be patched at anytime. I could care less about the \$15 loss I may take, I got 1-2 working codes made which is still in profit technically. I'll hold out and see how it goes the next day or 2.

Op wouldnt refund he was just money hungry selling a patched method

Copywriter - January 24, 2018, 11:03 pm

Lmao. Method has been patched, OP literally changed the price from 50\$ to 15\$ to milk the shit out of this method.

He's denying it as well, I mean you're selling a 1k code generator and you're not lying to generate more money.

Ben sucks at business lmao.

But everything is still up in the air. ?

Like I've said from day 1, this method WILL NOT BE PATCHED. Unless somehow it makes it on fucking primetime news and/or 5 thousand people all start doing it at once.

Fuck, I legit bought it like 2 hours before all this shit started.

Pretty sure it's patched now, did an account 3 days ago and nothing anymore.
