Thread: [RESOLVED - Stuck Bitcoin Transaction - RESOLVED](#)

TheRealNapster - January 17, 2018, 11:14 am

Hey everybody, I have these 2 transactions stuck from December 3rd and 4th accordingly.

I was told that the network would drop them after 2 weeks but a month and half passed and it's still unconfirmed neither the amounts were refunded back to my BTC wallet.

Originally both were sent one after another (with up-to 24 hours difference) from Blockchain app on iPhone.

The addresses are correct who I was sending to (double checked like 10 times).

If somebody could help or push so, they get confirmed, I would really appreciate your help.

P.S. the tx fees would look low now but the app suggested me to use them accordingly for 1+ hour delivery at the time.
