Thread: [GunBot \(Still Worth It\)?](#)

Xi Jinping - January 17, 2018, 1:16 pm

Hey Guys,

I lately wanted to invest into Cryptocurrencies and I see that GunBot is a very expensive but useful tool. I personally don't have that much time for manual trading and I am wondering or I should invest in GunBot. What do you guys think?

Best Of Luck,
Dr. Depresso

Skidy - January 17, 2018, 1:26 pm

Learn to invest on your own, do some day trading and stuff.

I don't think its worth it at all but some will claim otherwise.

You can make like 1% to 3% every day I think, so unless you have a big start capital I dunno. Profit is profit at the end of the day

1-3%? That is trash Imao

You can literally buy any coin at a low and hold for a couple hours and outperform that bot if that is true. I'm making close to 5-10% or more an hour just by flipping coins, do it yourself.

Skidy - January 17, 2018, 1:38 pm

I mean, if everyone could "just make 5-10% an hour" everyone would be multi-millionaires?

If you got in at exactly the right times then yes, look at TRX for example.

It's moved from 650-750 satoshis every 30 seconds within the last hour or 2. If you somehow managed to catch it everytime it dipped and sold at 1%, you'd probably be up 20-30% in the past hour alone.

I didn't make that much every hour to clarify, but for the past hour(s) and couple days it has worked for me.

"somehow" meaning buy limit?

you've made a lot but don't understand how trading works?

What? I'm saying somehow as in making sure you do not buy in at a time when the price is falling. No good having your buy order being fulfilled if the price keeps dipping after its bought.

You should be a billionaire by now if you can make 5-10%+ an hour.

You can literally double your money guaranteed every day?

saintstorphedo - January 18, 2018, 4:40 pm

As someone who actually owns it for Binance usage, don't use Emotionless, it's bugged and doesn't sell for some reason.... missed 12% gains for that one but anyways. If you have a larger capital that

allow for larger gains then yes it would be useful if you use bbsteppgain as your strategy, but that's all gunbot does, implement strategies, if you had the time you could easily sit at your computer and do it as well. I am trading ETH and not very much of it right now so let me give you an example of a trade that it made for me.

I gave it 0.11 ETH to play with, set my settings for my bollinger bands as I wanted them, and then went to sleep. You do have to pick your own pairs to trade and so I had listed 5 in there, in that time since earlier today it has put the following orders

So if we ignore the fact that NEBL is down as of right now and just look at POE the trades that it made, in just under an hour's time it traded for a total gain of 0.00129704 ETH which at time of writing is \$1.42 USD then take into account the \$0.05 USD fees that I paid in BNB and the overall gain isn't very much. Now you could say if I had more to play with then yes, the bot could be worth it, but then my risk is also higher, NEBL is down and that could easily have been more ETH in there as well.

tldr you could sit there and do it yourself if you have the time, all it does is implement a strategy that you pick settings for.

Smile? - January 18, 2018, 4:43 pm

I was searching for gunbot yesterday and found out that it's open source so you don't need to pay for it.

Zinedine Zidane - January 18, 2018, 9:27 pm

Stay out of this shit guys !

Do you want a real efficient and powerful trading bot ?

Look at SkyBot, the next big trading bot available for all exchanges.

Daily profit average : 15-20%

More infos here <https://hackforums.net/showthread.php?tid=5784469>

Best regards

shreder - January 18, 2018, 9:36 pm

people claim a lot more than 1-3% with gun bot idk

wiz - January 18, 2018, 9:40 pm

Take a look at profit trailer, i've been looking at it, costs 0.03BTC. I've been wondering the same thing, whether i should pull the trigger or not.

I disagree. I lost tons of money on my own before learning how to flip effectively. I would look for a mentor.

So then you agree? I am effectively saying use something other than a bot.

This guy doesn't understand that if you have money this would never work. If I buy lets say \$500k of a coin and the price moves up and it is a small coin dumping the \$500k would cause the price to go down. 5-10% is not realistic on the small coins for large some only though with a 25mil 24 hour volume or greater.

Okay, you're making 5-10% an hour, which, at 8 hours a day is 40-80%.

Taking the lower bound of that, with an initial investment of \$1000, in the course of a week you'd be making;

1 week - $\$1000 \times 1.4^7 = \$10541$

1 month - \$33,882,005

So how long have you been trading cryptos for? ?

Loot Lake - January 25, 2018, 5:56 pm

Idiots like you blowing everything out of proportion.

Never once did I state that I made 5-10% an hour consistently, I am saying it is doable if you catch the swings correctly.

Sometimes I wonder the average IQ of the HF user.

Well then the basis of your argument relative to the comparison of using a bot is irrelevant.

I'd still love to know how long you've been in crypto and how much you've managed to turn your initial 30 rupee investment into though ?

Ikr lol lets make some quickz maths :

5% x lets say 12 hours thats around = 60% profit / day

Imagine we invest 1k everyday

=daily profit: 600\$ /daily x 300 days (if you dont do it everyday) in year = 180k\$ ok

I guess he has ferrari already

Neal Caffrey - January 26, 2018, 5:30 pm

It's a shame that you choose to call anyone who questions you 'broke kids', if only you knew ?

You're welcome for the neg, retardmemberLOL XD

Also you should probably kys because my initial investment of 30 rupees is now over 4000 rupees so lol !

Mad Man - January 26, 2018, 5:49 pm

Fuck a bot just day trade or invest in high quality coins and hold them for maximum profits.
