Which one is the best? What's the difference?

I'd definitely say OSBuddy - get Pro as well. It's so cheap they're practically giving it away.

Client looks a lot better, more features, more stable (for me at least), overall just superior if you ask me.

If you aren't going to be using the Pro version I'd probably just recommend you go with another client, though.

IMO Konduit is my fav, and the best FREE osrs client.

however if you don't mind paying, I definitely recommend OSbuddy then

Runeloder if you have a shit PC it's easier on your PC.

OSBuddy if you have a good PC, get pro though.

Konduit is best overall imo. Far surpassed osbuddy a while ago and you get everything you get in osbuddy for free in conduit (even tho osbuddy pro is cheap as hell anyway).

I think the main thing personally tho with clients is just your general style. They all pretty much offer the same features, but it's just what you think is more pleasing, in terms of aesthetics and how smooth it feels to you to maneuver between features.

i have had osbuddy pro but prefer conduit honestly so much smoother imo

Konduit! Best for me, used OSB for a long time then switched.

zomgasd - January 19, 2018, 9:49 pm

Konduit, hands down. The best "free" OSRS client.

Thanks for your replies guys, I've never heard of "Konduit" before, but I'm downloading it now.

100% Osb. I agree with imajerk as well; get Osb Pro. So many features for just a few dollars a

month.
