Thread: [\[FREE\] XMR SILENT MINER | STARTUP | IDLE | NO DROPS | \\$\\$\\$](#)

**DeluxeSoftware** - January 18, 2018, 3:11 pm

[url]/url]

The miner offers startup [and installation], idle [only mine while pc in idle], mutex and injection and is completely working silently in the background.

Automated cpu thread configuration is also implemented.

While this miner is free, we also charge a little fee of 5% to cover the time coding this has costed. Thanks for understanding.

Be sure to contact me if you need anything and I'll help for sure. If this miner is going well, we might push an update which includes GPU silent mining too! You are also adviced to crypt the miner as we are not concerned to fud it; any .net reflection will work fine. You're welcome. Please keep the thread clean.

Special thanks to xmrigr, adderall, aeonhack.

**Scapula™** - January 18, 2018, 3:16 pm

Nice free release bro thx! ;) I hope you will become president

**Meedman** - January 18, 2018, 3:16 pm

Thank you for this free miner!

Hope you'll got tons of money !

Kind Regards,  
Meedman

**JustNothing** - January 18, 2018, 3:18 pm

Thanks for the creds! :) I enjoyed working with you.

**Ren And Stimpy** - January 18, 2018, 3:49 pm

HQ miner! Keep it up brother! Works perfectly.

**ZERO2SIX** - January 19, 2018, 9:53 am

tested and worked flawless.. vouch for this miner

**Jgwyn** - January 19, 2018, 8:20 pm

I cannot build my miner? How can I?

**Haise Sasaki** - January 19, 2018, 9:11 pm

Vouch, works like its supposed too.

**DeluxeSoftware** - January 20, 2018, 1:38 am

Thank you guys for your posts! ?

@Jgwyn

Builder works flawlessly for me and others. So you need to use proper values for the textboxes.

**DeluxeSoftware** - January 21, 2018, 8:41 am

UPDATE:

ONLY 5% ARE CHARGED AS FEE NOW.

Have fun ?

**princeyekei** - January 22, 2018, 8:38 pm

Hello. Since im still a newbie in mining thing can you aprox. tell how much could be average profit per month? What about this hash rate/power on this minner or on what its depends?

Thanks a lot for reply.

**DonJuan77** - January 24, 2018, 4:31 am

WOW!!! Nice miner....Thanks!!!

**CyberAlien** - January 24, 2018, 1:35 pm

Quick question, this can't bypass Deepfreeze in anyway?

**I N C R E D I B L E** - January 24, 2018, 2:38 pm

A version with GPU mining and minergate currencies mining support would be great. :)

**-Matatan-** - January 24, 2018, 7:44 pm

since monero is cryptonight, can i use this to mine sumo?

**I N C R E D I B L E** - January 24, 2018, 7:49 pm

**SwiftDoggo** - January 24, 2018, 10:31 pm

Hey man this is great, but I've been having one minor problem. I can get it crypted and running just fine, but it won't survive a reboot. I've tried in xp, 7 and 10 and in all cases it runs and mines just fine but on reboot it errors out. I'm not entirely sure what's going on, but I'm not using any sort of startup or install settings in the crypter. Any help would be appreciated.

**-Matatan-** - January 25, 2018, 6:38 pm

I tested this miner with both monero and sumo and it works very nice though, I am still looking for a good crypter that won't mess up the miner, any recommendations?

Sorry, to mine on minergate you must use the miner from minergate.

This is probably due to the crypter injecting the miner into a certain process which will be run at startup instead of the miner which was originally crypted.

A solution to this is using Reflection or selfinjection.

As you tested, it does work with every cryptonight currency! I don't know any good miner on forums. You should look into coding your own crypter. Even using Reflection would be fine.

Your miner works fine, I was simply asking for those who have successfully crypt it with no issues what crypter and settings they have used. I don't know C#/C/C++ or any language that I could use to code a crypter. Either way, the miner is nice.

I can't really tell but I would guess your CPU should have around ~200h/s at 100%. So yeah, result is normal.

Hello All!

I would really love to use this cool miner except I'm a complete newbie at this and I've been dying to try mining. But, I'm not sure where to start or how to get up to speed on how it works.

I would like to setup the miner and get started, but I'm not sure how. :-|

Could you please shed some light on how to get this up and running properly or point me in the right direction?

Is a VPS required? If so, should the VPS have certain specs?

Thanks in advance! :)

**NuckingFutz™** - February 23, 2018, 2:34 pm

This might be a stupid question but is the idea here that the miner can be planted on someone's pc and mine from their GPU without their knowledge?

**CoinMarketCap** - February 24, 2018, 6:19 pm

im trying to download it but its deleted by chrome before even complete download . can be tracked by antivirus ?

- pool stratum: pool address (you will find it on the website of the pool of your choice)
  - address wallet: your wallet
  - password: it is optional, it is used as an identifier (if you do not indicate it by default it is x)
- I hope I have helped you.

Wont let me download the miner can i please get help?

**Taserz** - May 15, 2019, 10:14 am

If anyone cares you can edit out the fee he is taking.

I created this strain of malware back in 2011 and it is still thriving... I hate it...

**martin1903** - June 1, 2019, 5:34 am

I would love to get a copy of this :)

**noname7519** - June 1, 2019, 9:56 am

Do you send me a copy please it's really interesting.

**xlr8** - June 7, 2019, 5:09 am

**S2K** - June 7, 2019, 12:29 pm

sadly op is offline for 6+ months, if someone already have this can send me?

**gambler111** - June 10, 2019, 1:31 am

Is this still valid? found some on google but seems so bad lol

**XxZahmAXx** - June 14, 2019, 12:48 pm

thanks is fully knowledge

**dragonslayer1** - June 20, 2019, 2:24 pm

The miner offers startup [and installation], idle [only mine while pc in idle], mutex and injection and is completely working silently in the background.

Automated cpu thread configuration is also implemented.

While this miner is free, we also charge a little fee of 5% to cover the time coding this has costed. Thanks for understanding.

Be sure to contact me if you need anything and I'll help for sure. If this miner is going well, we might push an update which includes GPU silent mining too! You are also adviced to crypt the miner as we are not concerned to fud it; any .net reflection will work fine. You're welcome. Please keep the thread clean.
