Thread: [WP Optim Wheel - new plugin for WordPress to show cryptocurrency data](#)

acolegario2 - January 18, 2018, 5:11 pm

WP Optim Wheel is a plugin that was recently approved in the WordPress.org collection, a plugin that has been developed by StudioWombat ([Free & premium WordPress plugins - Studio Wombat](#))

For now the plugin doesn't have demos, in the future it seems that the author will upload some.

The plugin will allow you, through shortcode, to display on your website information like

- real time price information, the top of the market or the volume information
- coin lists with real-time information
- price information in real time through API, powered by CoinMarketCap
- support several currencies (USD, EUR, GBP, JPY, CAD and AUD)
- and much more

If you want to know more details or download a copy of the plugin enter here:
