Thread: [Theme Selector](#)

oRequiem - January 19, 2018, 8:48 am

So I decided to make something that might be a little bit more useful when you're adding Themes for your Applications.

This took me a little while because it's just the same thing a million times.

I added a Download link and a Virus Scan from Virus Total.

If there are any bugs or you think a Theme should be added, let me know!
Enjoy everyone.

The Doge of Wall Street - January 19, 2018, 8:54 am

i'm sure some people would love to use this :) !

i'm also happy to see i'm not the only one that likes it

Soon, I might be adding pictures, but still thinking of ways to implement that.

It's going to take a long time because I would have to take a picture, add a button and constantly do that over and over.

I will most likely do that soon.

(Jan 19, 2018 09:57 AM)Orka Wrote: [\[CITE\]](#) Strange to see pagination in a tab control, you should try to implement scrolling.

Who doesn't like a bit of risk? ?

Yeah, having 2 pages is just weird to me as well.

Will be added in version 2 most likely.

Ninja - January 19, 2018, 9:05 am

Maybe, if it is not too much work, add screenshots to the application?

oRequiem - January 19, 2018, 9:33 am

the application?

Yeah, I was planning on doing that in the next update.

It's gonna be a lot of work believe it or not lol.

Not hard, just time consuming.

Dotexe - January 19, 2018, 9:35 am

Niceeee, this looks amazing man, would you add checking for updates ? for example if new themes appear :P

oRequiem - January 19, 2018, 9:36 am

No problem!

I feel like this should of been a thing earlier since there are plenty of newer themes out now.

If you find any good ones, you can leave it here as feedback and it will most likely be added in the next update.

An idea would be to have all the themes saved in resources & have a panel & when the user clicks on it, some controls fill the panel & use the panel's OnPaint() event for the actual theme & it would work fine. I used a panel with something like this for my custom theme generator I released here a couple of years ago.

Seems interesting, I appreciate the feedback.

Will look into it more.

EZLib - January 20, 2018, 7:10 am

Thanks for the release! Are all of themes dynamic as in if a owner of the theme updates it'll update as well?

oRequiem - January 20, 2018, 7:11 am

I'm not exactly sure if they update them, but I added the most recent ones in there as well.

Got it thanks.

MonEy - January 21, 2018, 2:14 pm

Great idea mate, could you possibly add a GIF or video to the original post?

I'm a busy bee at the moment and don't have time to download and look.

(Jan 21, 2018 03:14 PM)MonEy Wrote: [\[CITE\]](#) Great idea mate, could you possibly add a GIF or video to the original post?

I'm a busy bee at the moment and don't have time to download and look.

I was planning to upload a youtube video of it and what it exactly does.

Most likely will happen when I update it to version 2.

SaketSaket - March 6, 2018, 9:39 am

nice work on this.... great...

Zettabit - March 6, 2018, 9:20 pm

Just some constructive criticism, but why not use a PHP page to fetch themes from a database? It would make it much cleaner, as well as allow the addition of themes in the future. Something like this could even be hosted on a public code sharing site like Github to avoid downtime.

Lipz - July 23, 2018, 5:43 am

Looks very great, thanks man ! :)

oRequiem - July 23, 2018, 12:15 pm

You're quite welcome! Will eventually add more in there :)

oRequiem - August 1, 2018, 1:35 pm

Adding more themes to this program and hopefully next update will have update notifications :)
