Thread: [Looking to hire FBA / eCommerce mentor.](#)

Turf - January 19, 2018, 9:53 am

Looking to hire someone to mentor me in the technical aspects of Amazon FBA / Shopify / eCommerce so I can get up and running as fast as possible. I want to learn your mistakes and accelerate my learning. Specifically wanting to learn the technical aspects of setting up shop, store optimization, product research, finding suppliers, dropshipping techniques, driving sales with PPC, etc. Basically, the whole process.

Only looking to hire those who have built successful and profit-generating stores/shops already.

Willing to pay for ongoing mentorship.

I have worked with this website <https://shop.tentshare.com/>. PM me if you want.

kixboy - January 21, 2018, 1:43 am

Hello mate,

I am not very experienced with FBA but I do have enough experience with affiliate marketing, especially SEO and I have few Amazon affiliate websites. Now I want to move to FBA business/sites but I need to know more things about Amazon rules and hidden fees/costs, if you want I can help you to start without charging you any money, please send me your skype ID so we can discuss more on private.
