So Yeah, Hey There ? .

I'm in college right now for coding :D. ? . I don't know shit about code at all, but so far I had 2/3 Java classes. I'm lost as a bitch no lie....My first assignment I did amazing though. Second one was like ? . I got half of the code done for the second assignment and was lost and stuck at one point.

I'm thinking to turning this page into something:

1) Coding with me (Where I might drop the assignment's and you can do it along with the tread and learn)

2) Days of trying to learn Java.

3) Coffee and code.

Ect..

What were your assignments ? Post some of your questions ?

Feel free to post questions you might have as well. I may drop in every now and then if you'll be posting about your experiences, and I may be able to answer some questions related to Java.

Good luck! Java gets more fun as you get used to it.

I'm new here, but in college and learning Java as well. I'd be interested in taking a look at some of the files youve got if you want to post them ?

Hey I'm pretty well versed in android app development with java and other types of code, I'm not sure but there is probably someone who would be down to do it for you!
