??

Give something interesting with emotions please :) for example I watched ex machina before with other grill and it was simply boring choice (even tho the movie is good).

Something that would make her laugh and smile but not necesarrily full comedy

ask her if she wants ur child or not

yes/no/maybe - give her three options, if she decides not to answer; kick that bitch down the stairs

How old are you?

Honestly if you want to put it inside her during the movie watch 50 shades of grey or like an american pie movie. Works every time.

Watch Hachi <http://www.imdb.com/title/tt1028532/>

Tip; don't take a movie suggestion from a forum when trying to get laid.

Tip 2; watch something that interests her. The internet won't tell you her likes.

Tip 3; google is friend ;)

My girlfriend is sitting right next to me, she says that a romantic comedy is a good idea. 13 going on 30, failure to launch, bridget jones' diary... 10 things i hate about you. These are all her suggestions so all good ideas

I have more luck with mildly scary movies. It just gives the both of you an excuse to hold each other

Scooby - May 4, 2019, 4:06 pm

Funny Games is your answer. 100% sure thing. No need to look further.
