Thread: [\[WTS\] Selling \\$800 CS:GO items and 3000 dota items bulk ~\\$180](#)

I want to sell my old account that is community banned and i believe the ban will be lifted somewhere in 2020 (I cannot find where to find out but i recall seeing it a few years ago when the ban was first put in place [2015]) This is a profitable investment however you just need to wait a little that i was willing to do but im giving up gaming and dont see myself coming back in a few years to sell these items.

Selling it now for \$180 or highest offer, need it gone today.
A little bonus, it has borderlands pre sequel and GTA 5 ?

If it is trade banned I am interested but not paying that much.
Else if you can trade the skins I'd be interested in buying.

I will PM you now, what was the offer you were thinking?

You can't trade skins that are on a community banned account. It's banned from the community.

Unless you get it lifted, considering it's been banned for 2 years going to assume that's unlikely.

Well when it was first banned i read somewhere that the banned will be lifted but i cant find out where to see it again. Anyway you can still play csgo on it so its for sale.
