Not a part of this group, but just a heads up... Probably a good idea to drop a link to your portfolio or something.

And... You provided information about coding, not really graphic design. But I guess that can tie in with web design.

Lukas - February 3, 2018, 10:23 pm

Don't consider yourself counted out if I haven't messaged you yet. I'll be catching up on all apps within the next few days or so.

Looking to recruit a handful more of talented designers.

the6ix - February 24, 2018, 11:45 pm

This sounds like a great and perfect opportunity!

I spend a lot of my time designing stickers and graphics for companies.

Here's some sticker designs I've made for my own company(s)

And then I do custom editing for some stuff like this,

Definitely need some graphic designers in here, I need some work done myself. Good luck to everyone who applies, hope to see you in the group.

SIM-3323508 - March 16, 2018, 3:23 pm

I am not experienced in design nor do I have your fancy little portfolio but I am wanting to learn - hopefully there is room for a student in Sui Generis!

ORK24 - May 17, 2018, 2:57 pm

Here is my portfolio, deleted a lot of older projects so I don't have much to put there as of now, good luck to everyone who applies!

Good luck to everyone who applies, can't wait to work with some of you!

Neodraxis - May 19, 2018, 7:33 pm

I excel in Adobe Photoshop, Adobe Illustrator, and Adobe After Effects. I am proficient in Cinema 4D as well. At the moment I do not have a solid portfolio simply because my hard drive crashed and all of my past work was not backed up. I have some work lying here and there, but I'd love to be a part of the group. Please contact me if you have any questions.

PMS APPLICATION

My experience as a graphics designer:

My whole art journey started when I was a little kid, while in kindergarden, and that's where I found my passion for art, I drew pretty much everyday and all day and I was simply in love with the idea of creating something on a piece of paper, all though I did not really know what it was, I just knew I was in love with it. Over the years I developed my art skills and went over to using the program "photoshop", as I found it very fascinating and I could finally do more advanced art, and that's where I pretty much do all my artwork today.

DENIZ - June 3, 2018, 6:47 am

APPLICATION OF DENIZ

How I started:

I've always been into Digital Art. It started in 2010 where I first downloaded "PhotoScape" to edit Pictures taken by myself. In the end of 2011 I got myself Photoshop CS5 and started to learn the basics. It took me approximately 2 years to master the software itself.

My YouTube channel:

I started my own YouTube channel in mid-2013, where I uploaded SpeedArts - [click here](#).

I lost my interest into design in 2015 and moved back into editing photos again. I've been doing some graphicdesign for some time to get myself into it again.

Portfolio?:

I have no portfolio anymore (used to have one on Behance) and I've deleted the files from my old HDD and I really regret it. I can only provide my SpeedArts.

Why am I applying?:

It's actually just because I want to start doing digital art again and it would be a good thing to me to talk to some designers again to learn new and actual stuff. Of course I can provide alot of informations in the SF's.

Regards,

DENIZ

I have made pixel art for rpg maker forums for 5 years, have been a graphics designer for 8 years. My expertise is by far photoshop and pixel art. I would bring another asset to the group thanks for your consideration.
