Thread: [\[Official Appraisers\] General Recruitment #1 - Open](#)

Lrrr - January 23, 2018, 4:27 pm

NOW RECRUITING

What is Appraisers?

Appraisers is a group of high quality and community trusted members who will work together to make the Hack Forums market a safer place.

Appraisers will unbiasedly and incorruptibly review as well as appraise any/all marketplace offerings.

Appraisers will confirm account ownership, NFA holdings, BTC backing, and other deal-breaking metrics.

Appraisers will help to facilitate on-site deals by confirming vendor identities, product completeness, product originality, and product quality.

Appraisers do not accept any form of payment for favorable appraisals, with no exemptions.

Group's Userbar

Requirements

As a group that dedicates itself to appraising products and services as well as acting as a marketplace watchdog, we are the first line of defense between a great marketplace transaction, and a bad community experience for someone.

We believe that acceptance into Appraisers requires a level of community prestige as-well as a stead-fast and strong will. You will be asked for certain personal details to help prevent possible corruption. In the event of member corruption, Appraisers will hold the member personally accountable.

Member of Hack Forums for at least 1 year.

Must be an Ub3r member. (Approved but not upgraded does not count)

Minimum of 500 posts made

No open/unresolved scam reports.

Reputation is subject to inspection.

SectorseBook Appraiser

Binary Application Appraiser (EXEs, Programs, etc)

Service Appraiser

Accounts Appraiser

Application Process

Here's how the application process will work. You will fill out this initial application form first.

Upon acceptance of your initial application VIA PM, you will be given a public eBook, application, or service which you will appraise as your final application.

You will EDIT your original post to include your formal appraisal along with your initial application.

Initial Application

If accepted, are you willing to divulge personally identifiable information to group leadership? I don't see a problem as long as the information is kept confidential with whom I share it with.

For the Ebook:

Author/Publisher Information: [GoldenEra](#)
Application Version, eBook Publish Date, or Other Unique Product Identifier: Ebook Formal Appraisal. Published September 2017. "Dropshipping 101"
Product Quality and Originality: 9/10 (Well thought out and organized ebook) 6/10 (Method is over used and is well known)
Product Sales/Support/Feedback Analysis: Author provides quick reply and has many vouches on the thread. No conclusive evidence that the author provides any help after "purchase".
Product Price at Time of Appraisal: Free
Appraisers Suggested Retail Price: \$80-\$100 (\$89.99 as formal price)
Appraisers Notes:

Graphics: 8/10
Layout: 9/10

Quality of information: 10/10
Quality of method: 7/10
Response time: 10/10
Overall quality: 9/10

It is a very high-quality guide, well laid out and organized. Not only does he include various ways to use the method and also how this method differs from similar methods, but he also includes sources to even more information. The graphics are well done but in small numbers. However, having a small number of graphics means the author was focused on the information rather than the look which is a good sign. The author includes where the method has its advantages and disadvantages as well as what it would take to succeed using the method.

The e-book/guide could easily sell for \$150+. However, due to the nature, risk, and overuse/knowledge of the method, it could go for around \$80-\$100 depending on where he is selling.

Formal Appraisal # 1 - [Free Premium Spotify Service - Written by SoldierCrimes.](#)

-

Author/Publisher Information:

[Soldiercrimes HF UID \(3666938\)](#) Has been a member of Hackforums for about 7 Months (Joined Date: Aug 2017) User has 96 positive reputation with only 1 neutral from a user who is currently on a vacation ban. There are no current Scam Report / Deal Dispute on the member.

Application Version, eBook Publish Date, or Other Unique Product Identifier:

01-18-2018, 02:03PM First Edition.

Product Quality and Originality: SoldierCrimes Premium Spotify Service is one of many. The originality set is not included. There are several members who offer the same type of services in the Marketplace. Although the originality is not included within this service. The quality of the service still holds on to its customer promises.

Quality: ???? Originality: ?

Product Sales/Support/Feedback Analysis:User did not show much professionalism while posting this thread about the service, especially involving the warranty customers have on how long the service could last of the repercussion especially if the service does not last long enough. Personally, I wouldn't tell buying customers to not PM you if they're interested in the product. You will decrease your number of sales that way. Recommend the seller to restructure he's sales thread and be more informative with what the customer is purchasing. Professionalism, Grammar Check would be great, and further explaining the warranty section of the sales thread.

Product Price at Time of Appraisal: The current price for the service for right now is Free per account and members on the forum.

Appraisers Suggested Retail Price: Honestly, It depends on the type of person you're as a seller. If it was up to me and I knew the type of method that is being sold through several users in the marketplace for multiple fixed price. I would just provide this service for free as well. Originality is fixed and not set high enough to deserve to be sold for a price.

Appraisers Notes:

Customer so far has had great feedback on the service and no deal disputes has been open against him. You gain more sales and respect by selling products that not already being sold in the Marketplace.

Formal Appraisal # 2 - Bypass Uber/UberEats - Requested Appraisal by Faints

Author/Publisher Information:"[Faints](#)" HF UID (3805877), is a member of Hackforums for about a couple of days. (Join Date: 01-18-2018) There is not much activity from the user. The few post activity the user has made is inside the Marketplace section and the Free Giveaway Section. Based on reputation, he has a couple of positive reputations, but received a -3 from another member involving the participation of an vc and stated a DWC for the user. Honestly, he's account is still fresh to being able to sell a product on the forum.

Application Version, eBook Publish Date, or Other Unique Product Identifier:

[Secondary Seller Section or Ebook Section- Bypass Uber/UberEats Appraisal \(01-20-2018, 03:49 AM\)](#)

-

Product Quality and Originality:Due to appraisal & pricing request of this type of product, there is not a need to rate the quality of the product as of yet. However, It all depends on how efficient you are when it comes to having this sold. Are you selling a method or promoting a service ? When it comes to Uber services or ebooks, they always come to have the tendency of all being the same or only working for a short period of time.

From that being said, The Originality: ?

Product Sales/Support/Feedback Analysis:In the Marketplace you have two options, being effective and work your way to building a consistent clientele or being young and just want to make a quick \$45. If I were you, I choose to build a clientele and host a service. Reasons why I say this is

because 1. You would not have to worry about this “method” being leaked and reduce the rate of it being patched. 2. People care more about getting what they want then trying to get it done themselves. 3. You build a large scale growth in your clientele that can later lead to better service created for yourself.

Appraisers Suggested Retail Price:

There is no suggested price at the moment as the seller is still deciding the desired way of selling the product.

Appraisers Notes:

- First of all, I suggest that the user should do more research by checking around in the marketplace and seeing if what he wants to sell would be beneficial.
- Second, Please provide more information and explanation on what you mean by being able to "Bypass Uber/Uber Eats Methods, It will help us recommend you the best option.
- Third, please take the time to really engage on hackforums, you have not yet been here long enough to really understand what I am saying when it comes to originality and the importance of having a reputation. Take my advice.
- Finally, my feedback is based on my experience and what I see in the Marketplace. I rather have you be successful then for you to waste your time.

Any more questions, please feel free to respond to the thread.

What Country and Timezone do you Reside in? USA - Eastern Time Zone

Are you fluent in English? 100% fluent in English. Have been studying and active in educational environments up to the undergraduate degree level.

What sector are you most educated in? Service appraiser.

How much time can you devote towards group activities per week? 9 hours+ I am juggling time between a part-time job and full-time student, but am active throughout the forums on a daily basis. I have been since my registration date. Activity will likely never be an issue, and if it were ever an issue, I make it known and I always sort out any complications I have with leaders of any group.

Have you been a part of any official groups in the past? Yes - Red Lions is most noteworthy. I was a leader in Apex for several months as well. I have been a part of several other groups, but I dedicate my time solely to Red Lions as acting 2IC along with Lrrr, and would dedicate more time to this group as well.

Well done thread, Lrrr! Here is my application ?

What Country and Timezone do you Reside in? France. I believe it's GMT+1. It is currently 11 am. Are you fluent in English? I guess so. I do my best to become better and better in English everyday, I've been learning mostly thanks to HF. I believe this experience within Appraisers could also help me improving my English. I love to be corrected when I do a writing mistake.

What sector are you most educated in? Service Appraiser. Can also help with accounts appraisal and ebooks appraisal if needed.

How much time can you devote towards group activities per week? Okay I'm going to be completely honest with you on this, I do not know the exact amount of hours I could devote towards group

activities right now. Should be anywhere from 5 to 15 hours depending on weeks. Though, if I were to be accepted, I would be transparent with you to let you know if I have less time in a given week, or if I have more time, etc.. I do a special school in my city which is kind of weird and open 24/7. I am open to elaborate on that by PM, if needed.

Have you been a part of any official groups in the past? For sure. I was a proud member of 143, Infamous, Instinct and Legacy. I am now a proud member of Superior, and I would love to become one of Appraisers.

Thank you for this amazing opportunity! Accepted or rejected, I can not wait to see how Appraisers will do. I have high hopes for the future. Let's go! ? ?

I kinda disagree with both of you, while I agree that invites are also something that may work in this situation you have to consider 2 main variables with invites.

1.) Does the invitee actually need to be there, is there enough work in the group that we will need another body. We will first need to know the kind of work load we will be handling to answer that question.

2.) Adding members to a group such as Appraisers without the public being able to see some form of public application (IE: Transparency within the community we intend to serve) is a slippery slope, I am not against it but it would need a lot more thought on how the process would work.

Our community is first and foremost, and invites always have some side of curiosity to them...I like the community to know the members involved and see an actual application and they can judge for themselves why that member was HQ enough to join.

Mad76e - January 24, 2018, 10:45 am

Good luck with the group guys!

What Country and Timezone do you Reside in? GMT

Are you fluent in English? Yes, I don't speak any other language.

What sector are you most educated in? Accounts appraiser, service appraiser. It is likely that I won't have enough time to appraise ebooks. I would be happiest confirming ownerships etc. If you do start a middleman service I would happily join.

How much time can you devote towards group activities per week? Depending on the week, 5-10 hours.

Service Review

Author/Publisher Information: [Soldiercrimes](#)

Has no negative feedbacks in the 4 months he has been on site. The user has 96 reputations which is mostly from various giveaways including the method I am reviewing.

Application Version, eBook Publish Date, or Other Unique Product Identifier: [Free Spotify Premium Upgrades!](#) Posted on the 18th January 2018.

Product Quality and Originality: The quality of the method received was very poor, I received a PM including 5 steps. I have seen this method posted in the Free Giveaway section numerous times by different members which means it isn't very original.

Product Sales/Support/Feedback Analysis: The method received is worthless to anyone without an already upgraded account, this should be mentioned in the original post. Although the title of the thread states "Free", it is only "Free" if you own an upgraded "Non-Free" account.

Product Price at Time of Appraisal: 0\$.

Appraisers Suggested Retail Price: This is a public method and offered many times in the giveaway section, my suggested price would be 0\$.

Appraisers Notes:

-As soon as I asked for the service to be sent I noticed that you were checking your reputation straight away.

-The content of the thread is misleading and it would be worth mentioning you need an upgraded account.

Price appraisal

Author/Publisher Information: [Lil Baby](#)

Has only one negative reputation in the 7 years onsite. Lil Baby is an Ub3r who doesn't seem active any more or tends to have months off HF and then months back on HF. This can be seen with his 2 month online time in 7 years.

Application Version, eBook Publish Date, or Other Unique Product Identifier: [TH10 - Clash of clans account](#) Original appraisal posted on 22nd September 2017, but bumped on the 24th January 2018.

Product Quality and Originality: I don't see many Clash of Clans accounts on the marketplace nowadays so it is quite original. The quality depends on what the player is looking for, TH10 is quite high.

Product Sales/Support/Feedback Analysis: The account has now been up for sale at least 3 times in different sections. My main suggestion would be to lower the BIN price to what people appraise the account to be worth. The BIN currently set is double what people suggested. I would then include more information such as the builder base level on the account, this is a newer update which could add value.

Product Price at Time of Appraisal: 100\$ BIN on the sales thread.

Appraisers Suggested Retail Price: Due to the game becoming less and less popular I would now suggest setting the BIN price to around 40\$-50\$.

Appraisers Notes:

-Although the account is a high level the game isn't as popular any more which is why nobody is looking to buy.

-With a quick search online I was able to find an additional 755 accounts for sale. Quite a lot of which were higher level and under the current 100\$ BIN price.

What sector are you most educated in? Webdevelopment, it can be any source in PHP. I do have some knowledge about money making e-books and e-books containing exploits/bugs.

How much time can you devote towards group activities per week? All the time to satisfy the group, I'll usually be online 6 hours a day where 2 hours a day is active browsing.

Have you been a part of any official groups in the past? All the groups that Divined has owned.

(Jan 24, 2018 03:15 AM)iNuke Wrote: [\[CITE\]](#) Well done thread, Lrrr! Here is my application ?

What Country and Timezone do you Reside in? France. I believe it's GMT+1. It is currently 11 am.

Are you fluent in English? I guess so. I do my best to become better and better in English everyday, I've been learning mostly thanks to HF. I believe this experience within Appraisers could also help me improving my English. I love to be corrected when I do a writing mistake.

What sector are you most educated in? Service Appraiser. Can also help with accounts appraisal and ebooks appraisal if needed.

How much time can you devote towards group activities per week? Okay I'm going to be completely honest with you on this, I do not know the exact amount of hours I could devote towards group activities right now. Should be anywhere from 5 to 15 hours depending on weeks. Though, if I were to be accepted, I would be transparent with you to let you know if I have less time in a given week, or if I have more time, etc.. I do a special school in my city which is kind of weird and open 24/7. I am open to elaborate on that by PM, if needed.

Have you been a part of any official groups in the past? For sure. I was a proud member of 143, Infamous, Instinct and Legacy. I am now a proud member of Superior, and I would love to become one of Appraisers.

If accepted, are you willing to divulge personally identifiable information to group leadership? Of course, as long as we're all asked to do this. Plus, it is a good way to guarantee security, so yes, I am willing to do so.

Thank you for this amazing opportunity! Accepted or rejected, I can not wait to see how Appraisers will do. I have high hopes for the future. Let's go! ? ?

Thank you for your time but you are respectfully declined, but please feel free to re-apply at the next recruitment!

Formal Review #1 - How to Get Juuls Method - FREE for ALL Users; Written by Lavish Living
Author/Publisher Information:

[Lavish Living](#) (HF UID: 2028907), also to be previously known as "Gangsta Rap", "Mini CentOS" and his multi-account "[Zerker933](#)" which has been confirmed by Omniscient, is a member of HackForums for over 5 years. Upon reviewing his account, it is to be noted that he is accused of being a multi-account user which again, has been confirmed by Omniscient himself if you take a short second to look at his reputation page. Also, it is to be noted that this user has been accused of scamming on the current account of which he is on, and has been accused of infecting and scamming users on his closed multi-account.

Application Version, eBook Publish Date, or Other Unique Product Identifier:

The following method on "How to Get Juuls" was recently published as of January 23rd of 2018.

Product Quality and Originality:

Upon receiving the method given by Lavish Living, I was linked to a Pastebin URL in which contained the contents of the said method. As I read through the product, I noticed that this method is indeed fairly public as he stated himself in the thread so the quality of the product and originality of the product receives the lowest rating of 1 (on a scale of 10). Although he does state that the method is public, it is not similar to what he accuses of some sellers of selling.

Product Sales/Support/Feedback Analysis:

The product provided was fairly worthless for those who understand how to get free Juuls. However, do keep in mind that this is the most basic version of the Juul guide that is in the market. There are several Juul methods out there that are far much more advanced and go further in-depth of obtaining Juuls that this one does not provide.

Product Price at Time of Appraisal:

Due to the product being in the Free Services & Giveaways section, this product price at the time is \$0. Absolutely free.

Appraisers Suggested Retail Price:

Due to the product being both public, fairly known in some parts of the community and being given away for free, this guide should and always stay free.

Appraisers Notes:

- This method is the most basic version of how to get Juuls for free out there. However, it is not similar to some methods currently being sold.
- This giveaway seems like a means to garner reputation upgraded users in order to rebuild his broken reputation on the forum.
- Useless if an individual is unable to find the necessary item required to proceed on using the method, as this method is fairly saturated in terms of searching for the item.

Formal Review #2 - Steam URL Appraisal/Pricing Request Written by Wompus

Author/Publisher Information:

[Wompus](#) (HF UID: 3420267), previously known by the username of MattieWasTaken, is a member of HackForums for more than a year and nearly three weeks (Join Date: 8th of Jan, 2017). Judging by his activity on the forum, he is well involved in the gaming community and the marketplace. Upon

reviewing his reputation, 3 out of 36 members that have given him a negative reputation, two of which state to DWC. Although there is not much behind the reason to these reputations left on the user, I would assume it would be due to small conflicts between the users. I would not go any further to assume that he has scammed any member of the forum as of yet, as there are currently no threads or scam reports under his name nor HF UID.

Application Version, eBook Publish Date, or Other Unique Product Identifier:

Online Accounts - [OG Steam URL: "dollar"](#), requested an appraisal/pricing on the 20th of January 2018.

Product Quality and Originality:

Due to appraisal & pricing request of this type of product, there is not necessarily a need to rate its product quality. However, in terms of originality, I personally believe that the name of the given request is fairly original in comparison to many of the names of Steam URLs being sold on this forum or in the marketplace elsewhere.

Product Sales/Support/Feedback Analysis:

As stated previously, the following product being reviewed does not provide anything besides an account URL. As such, there is no product sales, support or feedback to analyze.

Product Price at Time of Appraisal:

There are currently no price for this product as the apparent owner of the product is currently looking for a possible price.

Appraisers Suggested Retail Price:

Due to the circumstances of which this is a Steam OG URL, where not many people usually would look up your profile, I would suggest a given price range of between \$75 USD up to a maximum of \$100 USD. I have seen much rarer names than the one seeking an appraisal/pricing go for around \$100 to \$150 but those are extremely rare ones. If you wish to seek examples, I may provide them per request.

Appraisers Notes:

- I suggest that the author of the thread provide more information as how the process of transferring the Steam URL onto the buyer's account.
- I also suggest the author to provide any form of evidence that s/he is the owner of the name and the account of which the name is on.
- Lastly, please note that my pricing is based off my experience of purchasing Steam URLs in the past and have usually not paid more than \$200 for a given URL name for steam.

Also take note that there are over 10 million active users on Steam as of data recorded in 2017 and that many users do not suddenly go look up Steam profiles like social media platforms (Twitter, Tumblr, Instagram, Facebook, etc.). Unless you are someone who is well known in the gaming community, having an OG name might be impressive to show off to your friends or just to have in general, otherwise in such a large community as Steam, it can be considered just a name.

Marketplace Appraisal:

Author/Publisher Information: [How to get juuls method - FREE for ALL users](#)

_Application Version, eBook Publish Date, or Other Unique Product Identifier: January 23rd, 2018 via Pastebin

Product Quality and Originality: I'd have to give the product a low rating on both as it's a free method and I'm pretty sure it's been public in the past as well as now due to the free giveaway

Product Sales/Support/Feedback Analysis:

It took around 10 hours to receive a response with the method so feedback was rather slow but much expected with a free product ALTHOUGH once reading the method it's clearly social engineering and classifies under disallowed black-hat activity.

Product Price at Time of Appraisal: \$0.00

Appraisers Suggested Retail Price: \$0.00

Appraisers Notes: It should be removed from Hack Forums as it violates the black-hat activity rules.

Account Appraisal

Author/Publisher Information: [Admin access to a network company](#)

Application Version, eBook Publish Date, or Other Unique Product Identifier: Not yet released posted for appraisal as of the 23rd.

Product Quality and Originality: Multiple servers that can be found elsewhere on the forums.

Product Sales/Support/Feedback Analysis:

I didn't personally purchase this one but I noted that Minimalist edited out his post of him saying they contained personal information so based off that advertisement I would say the sales are disallowed due to black-hat activity.

Product Price at Time of Appraisal: Non-listed

Appraisers Suggested Retail Price: I'd say to price these at the suggested competing prices in the market example found here or maybe a little lower to sell faster:

<https://hackforums.net/showthread.php?tid=5678056>

Appraisers Notes:

I'm not the most knowledgeable at RDP pricing but I used my best interoperation of Hack Forums policy and competitive pricing.

Author/Publisher Information: [Cryptography's Power Like Service \(BETA\)](#)

Application Version, eBook Publish Date, or Other Unique Product Identifier: Instagram Power Likes Service

Product Quality and Originality: The quality of the network was solid, better than most available for the price point provided. As for "originality" this lies solely in the hands of the customer. Cryptography does not, at this time offer management of the profiles but only a direct power likes service.

Product Sales/Support/Feedback Analysis: I received this service from Cryptography via vouch copy and must say the support was on par and fairly professional.

Product Price at Time of Appraisal: Upon speaking with Cryptography about the service he estimated the price at release to be \$50 for 35 post(s) a week. For the quality of the network and its reaction time I'd say this is a solid price point, great deal for those interested in direct promotions for their blossoming profiles.

Appraisers Suggested Retail Price: \$1.5-\$2.2/post or \$52.5 - \$77

Appraisers Notes: This service is fairly decent, but VERY broad. I would suggest the vendors make packages for a specific audience/niche versus a "One Size Fits All" approach. This would make for a lot more "success" at hitting the explore page as well as keeping other vendors true to the market. I posted 3 times to a personal account, two of which were relatable, the final a beauty post. Out of those three two of them landed on the explore page with one of them getting a great amount of exposure. This network has the potential to boost a lot of niches but as a buyer you HAVE to know how to plan to rank. With that being said, if you are new to the Instagram game and interested in growing a following I would advise against purchasing this service without having a helping hand to guide you through maximizing your reach.

Quality of Service: ????

Originality: N/A

Pricing:?????

Support:????

Author/Publisher Information: [CydiaDev's](#) Instagram

Application Version, eBook Publish Date, or Other Unique Product Identifier: Small Stat Instagram

Product Quality and Originality: Waiting on the user to send me the @ but based on the stats provided this is a VERY high quality account. The follower to active engage rate is as high as you could aim for.

Appraisers Suggested Retail Price: I would suggest the owner not sell for a penny under \$25/k and depending on the amount of post he could find a buyer at \$32/k.

Appraisers Notes: Owner noted in the OP he "got bored of selling dog merch", I would advise against selling the account short and if possible. Find a way to maintain the activity you currently have and grow the account to at least 10k, then place it on the open market (not HF).

Application Version, eBook Publish Date, or Other Unique Product Identifier: 4GB Virtual Private Server - Linux for a month.

Product Quality and Originality: The product/service is an OVH server sold by Tekkie thus when saying OVH you can already imagine high quality hosting, best anti-ddos protection aswell as the best uptime in the market.

Other than that Tekkie offers payments in cryptocurrency which is a huge plus and it's one of the reason that make it such a great service.

Powered by OVH and managed by Tekkie, PulseServers' VPS are some of the best in the Hosting not only in the community but also outside.

Author/Publisher Information: ganstephanos has been a member of HF for almost 3 years, he is an upgraded member and is part of The Executives, thus giving him some trust within the forum.

Application Version, eBook Publish Date, or Other Unique Product Identifier: Steam Account

Product Quality and Originality: The products to be appraised are Steam Accounts thus no originality here.

Product Sales/Support/Feedback Analysis: 2 Steam accounts.

#1 is a level 45 account which can be achieved by paying a few dollars on steam thus it's not a big add to value, the games it has are quite cheap so the account is only to be bought if the user wants to keep leveling or getting the games for half the price they were, something such as a fresh start with a new account.

Account #2 is a level 21 and has 13 years of service, only downside is the VAC ban which makes the account look bad in the community, other than that the games are quite fine, GTA 5, R6, Rust & Just Survive could all be bought for \$55 ish from key resellers.

Product Price at Time of Appraisal: None.

Appraisers Suggested Retail Price: Account #1 should be worth between \$30 or \$40 as a top because of it's lack of games.

Account #2 could sell for up to \$45 because of the games it has, it lost quite some value because of the VAC tho.

Appraisers Notes: The account #2 is not really worth buying in my opinion because of the VAC aswell as the low level, the VAC ban will follow you forever and having a VAC ban usually closes some doors within communities.

The games it has could easily be bought for half the price on reseller sites and the steam level is less than \$10.

Lrrr - January 27, 2018, 9:55 pm

This recruitment is now closed to any more initial applications.

Those who have applied but not heard anything, I will try to reply to all of you by Feb 1st at the latest!

Thank you to all who applied!

I was looking for new members but after the PM you sent to Divined trying to get me into some kind of trouble, I'm not sure I would accept you =(

Recruitment is now re-opened for a week. Those of you who I have not accepted or denied are still in the running as we may sometimes need more than originally recruited. Right now we are in need of 1-2 more members. Thank you to all who have applied and looking forward for all those who have not done so yet.

I am extremely saddened, I was looking to be an active participant in the group.

I am at work right now, but PM me and let's see if we can work it out I have no reason to have beef w you...maybe I just misunderstood.

What Country and Timezone do you Reside in? United States, and Central Standard Time.

Are you fluent in English? First and only language!

What sector are you most educated in? I think the eBook or Service sectors would be the best fit for me to appraise.

How much time can you devote towards group activities per week? 1-3 hours a day during the week and more time than that on the weekends.

Have you been a part of any official groups in the past? I have been a part of the old Empire as well as Influence.

What Country and Timezone do you Reside in?

United States / EST

Are you fluent in English?

Yes.

What sector are you most educated in?

I say I'd have a tie between both Binary Application Appraiser, as well as Service Appraiser.

How much time can you devote towards group activities per week?

On a weekly basis, I would be glad to devote upwards to 48 hours towards group activities. If not

more. I would say I am rather active on HackForums, and chances are, you'll see me around.

Have you been a part of any official groups in the past?

Yes, I've been in the groups listed below (but not limited to them):

- The Order
- The Executives
- Legends
- Skill
- SheepGang

Yes, I would be glad to do so. Have been looking for a quality HackForums group to join for quite some time, and the Appraisers seems like a great place to start. Formal Appraisal #1: Unlimited Spotify Premium Free! - Written by [Lukas](#) UID: 1034038

Author/Publisher Information:

- Member on HackForums since 2011.
- Currently in five non-purchaseable usergroups. (Wr1t3rs, R3kt, Influence, Heroes, Sui Generis, Divined)
- As of the time of this post, the user has: 1,278 reputation. All time statistics: (Positive/560 | Neutral/6 | Negative/0) *The six neutrals the user received seem to all be invalid. One of which was from a banned member.
- User is currently a leader of the group known as [Sui Generis](#).
- User currently has an open middleman service with one [vouch](#).
- User currently has no open deal disputes / community alerts.
- Time spent online is hidden?

Application Version, eBook Publish Date, or Other Unique Product Identifier:

- Original Edition: 10-02-2017, 12:54 AM
- Most Recent Edition: 10-31-2017, 01:37 PM

Product Quality and Originality:

Overall the product quality is average, and simply that. It is possible to see that the user most definitely has taken the time to make his product as visually appealing as possible, however, the product is one which has been given out on various occasions by various different individuals. The quality of the product holds to its promises, however, the product given is saturated, and is easily obtainable.

Quality: ??? | Originality: ?

Product Sales/Support/Feedback Analysis:

The user seems to send out the product on a consistent basis, but at times is rather slow to respond. The average response time from my personal experience with the user is twelve hours. Personally, I believe there are many individuals posting on the user's sales thread on a weekly basis, therefore one can understand that he is unable to reach every customer in such a short time.

Response Time: ???

Product Price at Time of Appraisal:

The current price of the product is: \$0.00 USD for L33t/Ub3r users on the forum.

Appraisers Suggested Retail Price:

\$0.00 USD. My personal reasoning for this is mainly the fact that the user's method is notably saturated. Like previously stated, the method is easily obtainable. Although it is probable that the user has taken a significant amount of time to revise the appearance of the method, the result is still the same.

Appraisers Notes:

Overall, I believe that this user has definitely taken the time to make his / her product the best it could be. However, the product, in the end, is still a saturated method. The user's response time is fitting. The user could have easily sold this method in the marketplace for a higher price, however, he / she chose not to, and instead give it away. If anyone is deciding whether or not to purchase

another user's "Unlimited Spotify Premium" method, I would recommend to first check out [Lukas's thread](#) first. Formal Appraisal #2: Steam account with some games - Written by [AlphaTurtle](#) UID: 5794249

Author/Publisher Information:

- Member on HackForums since 2016.

- Currently in no non-purchaseable usergroups.

- As of the time of this post, the user has: 112 reputation. All time statistics: (Positive/59 | Neutral/4 | Negative/0) *The four neutrals the user received seem to be all valid.

- User currently has no open deal disputes / community alerts.

- Time spent online: 2 Weeks, 4 Days, 11 Hours, 22 Minutes, 53 Seconds

Application Version, eBook Publish Date, or Other Unique Product Identifier:

User requested the appraisal of this product at: 02-03-2018, 07:27 AM

Product Quality and Originality:

Because this is not a product specifically created by the user, it is clear that the product originality cannot be determined. The Steam game platform account consists of three notable games: (Payday 2, H1Z1: Just Survive, H1Z1: King of the Kill, Call of Duty: Black Ops 3). Additionally, the product does not come with the original email linked to the account which could most definitely be an issue further down the road.

Quality: ??? | Originality: N/A

Product Sales/Support/Feedback Analysis:

Overall, in the market for Steam game platform accounts, the amount of people that are interested in purchasing at a retail price is diminishing. Most of the current accounts for sale do not have a specific price in mind and are simply looking for offers. The overall sales of this type of product is not exactly the best, thus I would personally recommend selling elsewhere for more money. Additionally, most of the current sellers have a very high response time. If the user is interested in selling this account, I would highly recommend being relatively active to make sure you get back to possible customers in a timely manner.

Product Price at Time of Appraisal:

There is currently no official price for the product.

Appraisers Suggested Retail Price:

From the perspective with the current games listed on the product, one could determine a sufficient price for the account would be: \$7.99 USD.

Appraisers Notes:

Overall, I believe the user has taken a large initiative making a thread in the Appraisals and Pricing section to help determine what an appropriate price for the product is. I would personally sell the product elsewhere, however, that would most likely mean that the product would not be paid out in cryptocurrency (assuming the user would want that). Otherwise, following my recommendations would more than likely play a big role in the sale of the user's product.
