Ben Shapiro - January 23, 2018, 7:20 pm

This script coupled with site design will allow users of your site to automatically re-broadcast their transactions. You can easily monetize such site by inserting ads or collecting donations!

1. Utilizes ajax
2. Simple yet elegant design
3. Rebroadcasts bitcoin transactions
4. Allows for donations in whatever form you would like

[\\$30 Click Here for AUTOBUY! Accepting all crypto and if you wanna pay with Venmo PM me!](#)

T.O.S.

- I will be providing support when I'm available. This site is so easy to setup though you just need to follow 4 steps in the README.txt
- Refunds will only be given on a case to case basis but as a general rule of thumb, I will not be refunding, especially if you cannot figure out how to use this.
- Obviously NO leaking OR reselling.

Do you have any vouches from anyone who purchased the script? Why was the last thread closed?

Yeah look in the thread there are many vouches. As I mentioned the thread was closed for unrelated things, I posted-deleted-posted in order to bump my thread, and I paid the price for doing this but I was advised I'm free to open a new thread.

Nobody who bought it from you vouched though. Is this still the CodeCanyon script?

I'm not sure if we're miscommunicating here. I'm looking for a vouch from someone who gave you money in exchange for your code. Does such a vouch exist? All the vouches in your previous threads were from free copies.

No reason to get all mad about it.
