TLDR:

<https://hackforums.net/member.php?action=profile&uid=3764715>

User has bought my Product which is all well and good after him flaming and trashing me on discord. He bought it one time refused to run my HWID system on the PC.

Purchases it second time the tool works fine. Lately instagram has changed their API and added extra verification Cookies which we have been working our best to try fix with about 2 updates every single night by me and my developer.

The user was unable to wait two days before filing a chargeback. Keep in mind during this downtime we compensated the users with a BONUS paid for bot valued at \$25 Bonus scripts and still maintained amazing support. We pushed an update last night and the bot is working fine and we are running more tests on it but the user files a chargeback after throwing a tantrum.

All i have to say is deal with caution.

Sorry to hear that. Instagram indeed does frequent updates and new people get impatient during the maintenance period of bots and third-party apps.

Sad to see people scam for 15 bucks...Must be a hacked PP. Post more proof so that the community knows about the scammer. Thx
