Thread: [Good spreading Method \(Yt Spreading\)](#)

hackingsploiter - January 28, 2018, 1:02 pm

1. go on youtube Type rc7 exploits and find one thats not much viewed And when you find one copy the url
- 2.go to <https://www.convertio.io/nl>
- 3.Paste the Youtube Link down if its done loading choose convert to mp4(Video)
- 4.Wait until is converted
- 5.Download the mp4
- 6.Put it on your desktop

Now Make sure to crypt the rat (i was dumb i could have 100 sessions but did'nt crypt my stub so only got 5 ?)

Download a File binder I dont know if the file binder i use is safe to use on main i dont wanna get banned for posting (infected Links)

Here is a link off one fake Roblox exploit You can look the source if you dont trust (This the file you bind with your stub you created and crypted)

<https://www.sendspace.com/file/lcxzhd> fake exploit

<https://www.sendspace.com/file/1tzbv4> Fake exploit source

[VirusTotal](#)

[Virusscan Jotti](#)

Now bind the fake roblox exploit with your crypted stub to make it look real

Setup a fake youtube account calling it Roblox Exploit or something

when done creating fake account

Get to random filesharing site like sendspace upload copy url

press on upload button

and drag and drop the .mp4 file on it

Now Name it like (OP level 7) Roblox exploit Free!

Post download link in description

within an hour enjoy your clients ?

CHANDL8R - January 28, 2018, 1:12 pm

seems legit, might try this out, thanks op

CyberStrike - January 28, 2018, 1:18 pm

You do realize that VirusTotal will distribute to every AV company, at the very least use something that isn't "newer" it'll screws over everyone using that same backdoor/RAT. Give it a week see how many detections you get then. (At least use something no one uses also don't ever crypt then upload you will totally hose anyone using that crypter)

hackingsploiter - January 28, 2018, 1:30 pm

Np trying to get my trust back

PerfectStorm - January 28, 2018, 1:33 pm

I just hope your derp ass aint using the same crypter as me. On subject, isnt this just the same youtube method that started in 100 bc ?

hackingsploiter - January 28, 2018, 1:34 pm

I did not use a crypter when i used this method like a said

inyourmemory - January 28, 2018, 2:33 pm

Nice youtube exploit kit private HQ spreading method thanks.

PerfectStorm - January 28, 2018, 5:16 pm

So you made up the fact that you/we would get 100 infections? inspiring lol. Also bs. Sorry to be blunt.

CyberStrike - January 28, 2018, 7:04 pm

Alright well yeah I get it now as to why you used VT. Also good thing you didn't use a crypter if you wanted to post the src code why not just place it on github or something would make your life easier.

Cannooo - January 28, 2018, 7:31 pm

What's the point? All you'll get is some 9 year olds playing Roblox. If you're into that kind of stuff, then go for it bud, I ain't here to judge.

PerfectStorm - January 28, 2018, 7:34 pm

TheWarOwl - *January 29, 2018, 11:15 am*

"Use youtube" and "good spreading method" and "Use virustotal" need I say any more?

-sigh-

CinemaSins - *January 29, 2018, 4:37 pm*

You will mostly be getting little kids playing roblox lol
