I ain't poor for using a free theme, but I don't see a reason to pay for a theme yet. I've got a lot to fix, but will fix that as it's growing :)

I don't think a light theme suits the forum niche you are presenting to us, imo. I would suggest a darker one. GLHF

Yeah I don't think using a free theme shows how much you care about your potential audience.

TL;Dr, a forum which will most likely die out in a couple of months after OP gives up on it. (Hard truth)

It's got a nice domain though.
