Thread: [Hacking/Ripping A Website](#)

GTMX - January 28, 2018, 3:29 pm

So basically there is a kid who is very mouthy and cocky who likes to DDOS people for no reason so i just want to teach him a lesson but non of my software can rip/take down his website. So could anyone rip it and send it me please? or even do worse and take it down? Or even do both...

Link:
nelstv.xyz

Thanks,
<3

Seems you've found yourself a hitman. Honestly, it's best to avoid that kid because it's my belief that you are moving along the wrong path. Just learn all you can about hacking and walk a higher path. A great amount of money will be blessed upon you.
