Thread: [New Color Correction - YouTube Thumbnail](#)

oRequiem - January 29, 2018, 5:44 pm

So I got some new Color Correction, what do you guys think of the overall thumbnail?

Looks like every other COD thumbnail. Literally nothing special about it imo. I too can take a picture of me viewing my gun, photoshop it with a few quad feeds in the back and slap text saying whatever I wanted right over it in bright colors, just like every other cod youtuber or any youtuber for that matter has done. Sorry.

gl with your channel tho

I'm guessing the public education has failed you.

I specifically said "New Color Correction".

Looks great man! Would definitely click on that thumbnail...

Nice channel btw ?

FXstudio - January 30, 2018, 5:09 am

look good, i think need more work but nice work

More work? Like what though.

I don't know anything about these thumbnails or if that's the style but the huge white stroke around the gun is horrendous.

thumbnail images turn smaller so the huge outline is perfect in the size of the thumbnails.

Can you post the original so we can see that as well?

You are really TheDiamondHit? We used to work together I was the owner of Lordsworld back in 2012-2016.

[Video: <https://www.youtube.com/watch?v=4aZswdE3qq8>]

I still have no idea how they did this but my account was n46.

Wait, you were in that old video with me?

You have to remind me who you were man.

Original? What are you talking about.

That's fresh from me.

Looks really nice, not pixelated of any sort. How were you able to enlarge the text box without making the image grainy/pixelated?

Euhe - February 1, 2018, 9:50 am

Not a huge fan of the edgy curves that weapon has and of the low quality, the picture exudes. Not sure if this has to do anything with the colours you have used while doing your job. It still looks pretty good.

Which textbox?

The killfeed?

I don't really know what I'm giving feedback on

your ability to slap pre-made, saturated stocks in the sloppiest fashion possible or your ability to slap on a pre made color correction

They're my own color correction, not someone else's.

Nice job. Seems a little pixely around the edge of the gun. However, I expect something like this will get really good Click-Through simply because it stands out. Nice.
