Thread: [HF Characters - Free Cartoon Avatars](#)

Novica - January 30, 2018, 5:46 am

I had a lot of fun working on [these](#) so thought I'd make a couple more, custom ones, for free. Pick a theme or a character from a cartoon, fill out the form and post it down below.

Form:

Code Theme/Character: Lorem Ipsum

[spoiler=Image:][[/spoiler] (Post an image of a character or a theme you've picked)

To make it clear, I'm NOT doing custom cartoony avatars - if you'd like one, you'll have to [purchase it](#).

I'll be only taking requests that I find interesting or/and fun to work on.

Second this. Would love to see a simple video is normal speed that shows the keyboard clicks, as well as mouse.

I bet that would be easy to learn from.

Would be dope for a new avatar.

Also, (up to you obviously), but I think if you make these avatars approximately the size of Maxim's avatar they would look even better. I personally just like the larger avatar look with less black space, but that could just be me.

Theme/Character: Bandaged or heart ripped out or both... Preferably both.

Image: [\(Click to View\)](#)

And this iconic moment in history.

Because HF breaks my bones, then rips my heart out when shit like this happens.
