Thread: [NVIDIA GeForce GTX 660 SCREEN TOO WIDE?](#)

Always Sad - January 31, 2018, 12:41 am

I tried everything screen is too wide right now
any help would be appreciated!

webdev77 - January 31, 2018, 8:20 am

I can assure you that your screen did not change sizes. Your resolution may have changed though. I suggest setting your resolution to the monitor's default resolution. Check your software settings related to scaling as well.

FiftyTwo - January 31, 2018, 8:25 am

Did you recently install the GTX 660 and this issue came with it?
Or did the resolution change randomly?

Always Sad - January 31, 2018, 12:37 pm

The resolution was too wide right after i installed the GTX 660.
And yes i did change the resolution since it was way too wide and big.
I did change the resolution to a better fit but it is still too wide!

Did you check the scaling?

How do i check the scaling?
Sorry im a complete noob at fixing PCs

Thanks but still having struggles
The link you sent me didn't really help!
Frustrated!!

Just updated driver again.. Still too wide!
