Appraisers Review Archive

Review Archive
This thread will remain a repository of the body of Appraisers reviews. There should be no actual review data posted to the sales thread itself (to stop any kind of "trashing" claims). All reviews can be found here!

Cardano - *January 31, 2018, 9:18 am*

Looks pretty nice, maybe you can review my SM product I'm selling in the future.

Galaxias - *January 31, 2018, 9:26 am*

Galaxias' Service Review for "[PROXY.SHOP] Residential Proxies - NO MORE BANS - CLEAN IPs", requested by Mr. Burnham
Service Link: https://hackforums.net/showthread.php?tid=5732624

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to test out your service that you are providing.
When I am reviewing your service, these are the following things I have looked at and will be followed up in my post later.Your website (e.g. the navigation, usability and efficiency of going through your website)
The quality of your proxies (or "residential IP address[es]")

As described in your service thread, from the date that I reviewed your website, you are currently offering the following prices:$75 USD for 300 proxy credits ($0.25 per credit)
$100 USD for 500 proxy credits ($0.20 per credit)
$180 USD for 1000 proxy credits ($0.18 per credit)
$300 USD for 2000 proxy credits ($0.15 per credit)

Furthermore, your service at the time of review states the following statistics:More than 8,000,000+ different proxy locations
More than 160+ different proxy countries
More than 50+ different proxy states
All data is encrypted from entry point to exit node

Your website is very simplistic and does not clutter too much unnecessary features or presentation of information that would waste a lot of users time. Most of the content on your site is straight to the point which allows users to enter without hassle. Your registration process is fairly swift. All an individual has to do is open your website, register, and instantly login to continue onward with utilizing your proxy service. After being able to create an account on your website fairly quick, I am then presented with a simple format of the dashboard which provides me the information I need to know.
The number of proxies I am able to use
The total balance I have from deposits I've made

The number of proxy accounts that I've created
The number of pending deposits made to your site for purchasing credit
The previous IP's that I have already used

On the left hand side of your website, we have 5 different tabs (Dashboard, Balance, Add Funds, Purchase Credits and FAQ). I believe that the balance tab is unnecessary to have. Your add funds and purchase credit could be combined, but nonetheless, your layout of your website is very clean and allows users to understand where to navigate to purchase, deposit and look for answers to questions they may have. The deposit page is pretty simplistic as everything is preset with a default deposit address linked to the account. Purchasing credits are self explanatory as well.

As a result, your website's navigation, usability and efficiency is rated fairly well, on a scale of 1-10, you receive a 9.4 from me. If you have any questions as to why you lost .6, feel free to message me. Now moving onto the residential proxies themselves! I will be fairly honest with you, rating your service has been difficult to do as you most likely know that proxies tend to have very unstable long-lasting usability. Some proxies may last for a few minutes, some maybe half an hour or more.

For those potentially purchasing this service, please keep in mind that in order to utilize your credits to make proxies on the website, you must first create a proxy account. From there on, you will then have actions presented to you that say "CHANGE IP" or "Delete", click "CHANGE IP" in order to update the proxy to what you'd like it to be. You are given the option to change your country to whatever country you insist on using and the state as well. You are also given the details of its IP address, city/state and country of that specific IP you were given.

Anyhow, I created one proxy account first to test out the service. I decided to use Texas as the state I wanted the proxy to be in and setup everything I needed through my browser settings to do so. Shockingly, the literally amount of time that this Texas proxy lasted me, was less than 3 minutes. I wasn't too surprised about the length of time the proxy was as, well, we know that proxies tend to have a unstable length of life usage. HOWEVER, what was odd to me was that the proxy account I was using, had suddenly updated its proxy that it was using (without de-crediting my account for making any update to the proxy location) from Long View, TX to Los Angeles, CA. Shortly afterwards it updated to Summerville, SC. For many users who will potentially use your site, they may find this odd and ruin the purpose of purchasing these residential proxies, if they are constantly changing its location and not staying stable to one that we pre-selected ourselves. Please clarify whether or not this is intended or if this is some type of bug that you did not realize is happening and will fix this bug as soon as possible.

However, I further tested other locations, such as the United Kingdom, which I was then assigned to a Glasgow, Scotland IP address. It worked fairly well. I tested more locations such as Taiwan, Japan, and more to utilize the diverse set of locations that you have to offer for users and I must say, I am highly pleased in this. Not only are we able to pick locations of IP addresses that we personally wish to utilize, but we are able to potentially select a city as well. Another thing I test was for speed, and many of your proxies were fairly fast which means I am able to utilize them for my needs whether it be logging into accounts, emails, or anything else I'd need a proxy for, it means I can do them quickly without waiting for sites to load up due to low connection speeds and so forth. As stated in your sales thread and your website, you do indeed offer reliable residential proxies that do not get picked up as proxies by sites that test whether or not you are using a proxy. I can confirm that your service is legitimate and as described, and as such I wish to provide you with my final thoughts along with giving information to potential customers below.

FINAL THOUGHTS

As I stated earlier, I reviewed your website along with the proxies that you are selling in your service to ensure potential buyers understand what they will be buying and using. Given that I was credited 50 proxy tokens and tested 4 proxies for well over 1 hour (as some proxies did not last for long while others did), I can say that I am satisfied with the service after reviewing it. However, one of the biggest problems for me, assuming that I am a potential customer who wishes to buy your service for lets say... getting into a social media account. In this scenario, I understand that your service provides residential IP addresses, of which a unique feature you offer is the ability to select the state and city that I want to be in. Knowing this, I select LA, California to login to an Instagram that I was able to get login details of which the user is located in LA. However, as I stated earlier in my post on my findings of the proxy location being constantly changed to different locations, WITHOUT ME updating it, can be damaging to my attempt to access the account. However, the overall experience of using the proxies are great, some last long enough for my needs, some do not, it happens, I know that and hopefully potential buyers know that as well. These proxies are indeed are residential and they really do work as described.
If you are attempting to utilize these residential proxies to be at one specific location, this may not be the service unless the bug (if it is a bug) is fixed
If you wish to be able to browse and access websites without the requirement of having your IPs be different every time, this service is useful for you
If you need fast connection speed proxies, this is for you
If you wish to utilize proxies that are not classified as proxies but actual IP address from real ISPs, this service is for you
If you are looking for a good price per proxy plan, please take a look at the pricing comparison above and make your choice (or compare to competitors and decide)

Again, thanks for allowing Appraisers to review your product and I hope you are very satisfied with my review.

James Burnham - *January 31, 2018, 1:07 pm*
Props to @Galaxias, very well written review.

Requested Appraisal - "The Chrysto of Crypto - Requested Apprasial by "Thomas Shelby"
Before I begin my review, I would like to thank you for allowing us ("Appraisers") the opportunity to review your ebook.

These are the following things I have looked at while reading the ebook and will end with a follow up on my post later.
As described, the seller begins the ebook using himself as a reference and talking about his own experience being a crypto investment.
Describing the success and failures the user has faced on his journey over time.

The user described that customers are not required any knowledge about trading for the method to work for them. Even though it may be right, writing the ebook in a way for the readers down to the dot so that they understand what they are doing will be very beneficial especially when it comes to support post-purchase of your strategy. Although in the beginning, you described certain things about "TradingView." You can describe to the readers about the full details of the site and why they need to use it. I understand many believe in trying to go straight to the point of the method to save time, but understand you will have several readers wanting to purchase the product with absolutely 0% knowledge of anything that is going on. When it comes to Investing, it is not the same as

purchasing a regular money related ebook you can purchase in the "ebook bazaar section." You have to have at least a little bit of knowledge to have set even to be able to point out common mistakes you do not want to readers to make, or else it will leave confusion and several support emails coming your way.

Furthermore, I love the screenshots and having multiple arrows point to where the reader should pay attention the most. I just have a problem with understanding what the screenshot is trying to explain. You have several descriptions underneath your screenshot, but they are not talking about the specific arrows in the screenshot entirely.
You have an arrow pointing at "NEOBTC" and "crypto - BITTREX," but you did not explain the meaning behind why the reader has to pay attention to it. More detail will be necessary. The idea of having a short section on "Rules you should always stick to." is very important because it's considered a warning to the customer on what to follow in order to be successful while using this method. Overally, compared to several other ebooks in the Marketplace, you can tell that the writer put a lot of time and effort into putting this ebook together and thats very important.

There are many sections in the ebook where I was able to understand what the writer was explaining because he was very descriptive. I just want it to be more rooted demonstrated in the screenshots provided. Talk more detail into Tradingview. Go into more details about candlelight. Talk about the risk there are when the reader does not follow specific instructions, etc.

Final Thoughts
As I mentioned before, the ebook is a good read, very informative. Just need to be more descriptive in a majority of your screenshots so that the reader can fully understand what they are looking at to be 100% successful while using this method. If you're looking for a good price in the future, compare and contrast between products in the Marketplace and see what the packages include while trying to match it with your own product.
If you already know the basic and know that you're ready to get into the method, this ebook is for you.
Informative descriptively, but not visually(completely).
Step by step instructions from the writer to guide you on what you need to do and how to do it.
If you understand crypto speculation and trading already, you should not have a problem in understanding the ebook.

Requested Appraisal - "Titan Branding"(Graphic Service) - Requested Appraisal by "Titan"

Before I begin my review, I would like to thank you for allowing us ("Appraisers") the opportunity to review your Graphic service.

As described, the member "Titan" has a hosted service in the Marketplace, in the Paid Graphic Section. Based off of the thread, he has held that their mission is to "create innovative designs to give complete customer satisfaction." Even though the thread does not have as much reputation as of yet, the user is still capable of providing premium customer support. As a member when it comes to looking to get several designs completed, many of them forget the #1 rule when it comes to bringing their services to Hackforums and that is customer satisfaction. It is always disappointing when members who are looking to make a quick buck, charge overpriced deals for minimum work, but this is just an overall statement for the entire section. Let's get into the specifics.

One of my few concerns is proof of verification. What that means is, as a seller and graphic designer, what do you have to offer? The idea of how a thread design looks like is fundamental. I always like to break it down as what a customer needs to see when it comes to a sales thread made

by a designer. A graphic designer's personal sales thread should be very creative, grammar corrected and filled with information so that the customer can agree that you are the one they want to hire.
I usually set out for a format that I have seen from comparing and contrasting what is most effective in this section. Title
Description (who you are)
Reputation (showing proof) (Let me provide an example: when you use statements like " Had many experiences since 2014, please show proof, don't just use a statement. Also, what do you have experience in, many tools can be used and sometimes customer need to know what programs you are efficient in just in case they have a vital project they want you apart of.)
Skills:
Portfolio: (customer tend to hire you a lot more when you have a portfolio.
Pricing:
Contact Information:
Payment Method (Optional)

Usually having your thread arranged like this will increase your sales for sure.
I gave Titan an assignment; he was able to complete it in less than 24 hours. I am impressed; many designers tend to get it usually done after a day or more. The design was not messy at all; I did not see random icons in random places just to make it seem more unique, I did not even go into specifics with the user, just told him to redesign a random sales thread. Everything I have mentioned tells me that this member is serious and ready to get the job done as stated. There are many rooms for improvement on your sales thread when it comes to being informative as well as the structure, but this was an overall good job.

Final Thoughts.

- Make sure you take my advice and try to restructure your sales thread, this will help you a lot and increase your sales.
- Keep doing what you are doing, I do not know what happened to you in the past but won't consider it with this review. Continue to respond to customers in a reasonable time and your service will grow.
-If you are looking to receive quality work in a reasonable amount of time make sure you contact this user.

Galaxias' eBook Review for "GET FREE ITEMS METHOD [EASY & NOOB-FRIENDLY]", copy provided by JillOk

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.
When I am reviewing your eBook, these are the following things I have looked at and will be followed up in my post later.Content originality
Presentation of information
Difficulty of performing the method
Cost versus worth of your method

As stated in your sales thread, this eBook contains steps of obtaining free items with very little difficulty of succeeding. I, personally have never seen this type of method before but do know these websites that you have provided. Even though the sites are fairly well known, at least to those who are involved in the online marketing field, I highly doubt anyone or the greater population of users

here on HF or elsewhere is aware of such a method. But don't take my word for it. The types of items I can get from this method are what I believe to be small and just for shits and giggles, but too sure about other items.

The eBook itself is a very short and brief read. Given that the method is fairly simple and quick, I don't believe it needs to be any longer than it already is. The formatting that you picked is fairly simple because it's just texts separated into numbered bullet points for readability as if it was an instructions manual. However, I do believe that you could provide some pictures that show guided lines on what a user should do, for those who understand how to do things visually. The way you presented the steps are fairly decent, but could be improved better for clarity but nonetheless, it's good and understandable.

Lastly, you stated that this is a fairly easy guide, and I can see as to why that is. It's a very simple yet doable method that can bring in great items that are of low value. I am not too sure about this working on higher valued items. I have not tried but if I do and it works, I will gladly update this review to incorporate my feedback and difficulty on them. The pricing for your eBook at the time of my review, is at $9.99. And, for such a small price, I do believe this eBook can be valued at just that, or maybe a little more if you perhaps improve it more and incorporate images. But, nonetheless, due to the length of your eBook and simplicity of it, I do not believe there is anything else I need to provide my review on.

FINAL THOUGHTS

For my final thoughts, there isn't much to say besides the suggestions I made previously. I'd highly suggest including images if you plan to update your eBook so that it will allow users to understand what the text is referring to or to allow users who do by looking, have a much easier time doing so. The content is fairly great already, if you do however, find any new information needed or even suggestions maybe on products that users can attempt to get so they can resell, include them. This will make your eBook much worthwhile to do.

Also include information about how long it will take to receive the items, what things you suggest not to attempt to get, and any further information on how a user improve their skills in communicating to obtain items, as this method does indeed require communication skills to succeed (in some cases).

Again, thanks for allowing Appraisers to review your product and I hope you are very satisfied with my review.

Galaxias - *February 8, 2018, 3:32 pm*

Galaxias' eBook Review for "FREE Shell Gas Method [Cheap & Trusted]", copy provided by Ben Shapiro

Product Link: https://hackforums.net/showthread.php?tid=5794820

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.
Alright, this review is going to be fairly simple and short, just as the method. I would like to mention that those who have received or already knew about the Shell Gas method, to understand and know that if you wish to still receive gas, this version with additional steps that you must take, will be

something you'll be interested in. So, let's begin.

I received a PM from Ben Shapiro, about nearly four days ago, and was told that he had found a new way to get credited points for Shell rewards to get discounted gas. He then asked me whether or not I'd like to review the adjusted method to review for him and I agreed. I was then presented with well, just the picture of the old method and then another picture of the adjusted method that contained the additional information and steps that I needed to know to re-perform the method once again but this time without triggering any red flags to Shell's system. Given that I had my doubts about the authenticity of the method, I thought this wasn't going to work and that it was just a waste of time but I tried it anyways. I was then provided by Ben the key factor of what is needed to do the whole process, which took a bit of time to do. Originally, it took him about 1 day and a half to reply back with it, but nonetheless, he provided me with everything I needed and I tested it.

I was kind of disappointed in how long it took to get responses from him, but still, he has a busy life and so do I. That's understandable and nonetheless, it didn't matter as much because of the fact that this method does indeed work, and I have tried it with 2 accounts. For those who are hesitant in purchasing this method, don't be, as not only do you get provided with the guide, but the materials you need to get it started to create the amount that you need. He also offers full support and answers questions (in sometimes a timely manner) that you may have.

Proof (I did this for my friend):

FINAL THOUGHTS

I would like to mention, that this guide is shared between Game Freak (he originally found this) and Ben. They both made an agreement to do 50/50 split (IIRC) for selling, so if anything, both of them should be able to answer your questions. The overall guide is indeed simplistic and the offers he makes (packages containing extra tools to create accounts with rewards) is a very good offer for the price he is selling at. The time it takes him to answer questions... varies. Sometimes he's quick, sometimes he is extremely slow and that kind of disappointed me. With the drama between him and Game Freak cleared, I'd say this method is worth buying from Ben.

However, do keep in mind that it is possible that at any moment, Shell can patch and/or restrict recently created codes, as they did last month. Furthermore, I want to suggest to Ben that you include places where buyers can find players to purchase the necessary materials to make this method work. It'd be nice, but overall great product.
That is all.

Again, thanks for allowing Appraisers to review your product and I hope you are very satisfied with my review.

?heshire - *February 8, 2018, 3:39 pm*
hmm this is a well executed version of what Mr Reviewer tried to do.

Zink - *February 9, 2018, 8:55 am*
Requested Appraisal - "Cash Revenue - Requested Appraisal by "MortyYellow"

Before I begin my review, I would like to thank you for allowing us ("Appraisers") the opportunity to review your ebook.
These are the following things I have looked at while reading the ebook and will end with a follow up on my post later.

Based on the information on the first page of the ebook, appearance is usually a concern to me especially when I am spending a lot of money.
Before we dive down into the ebook, appearance of the book is always something I like to look at, when you look at it from a customers perspective especially when that customer is spending money on the ebook. The structure of the format of the ebook is deemed to be strange to me as there are several different fonts, format, size, bold italics all over the ebook. It is kind of confusing even to try to go on reading the method when everything is going all over the place. I highly recommend as a seller to at least restructure the format of the ebook to fit the customer beneficial aspects of reading the ebook. Reasons why I am mentioning this as concerning is because when it comes to ebooks, it easy to tell when methods are copied and pasted and formatted into an ebook based on the different fonts and text size. It was showing me that the plans were not handwritten. Again, this is an observation from what I see in the ebook.

The Methods

Now, let get into the methods. I was very concerned about some of the methods with the change of style and font and wanted to see If any of the methods were either copy and pasted, so I decided to run each method through a database on Google and found few of the methods to be the word for word. I stumbled upon another site that holds the methods on the site. A screenshot will not be provided, but you are able to search up the methods and find results on Google. Especially the first one as it was pasted word for word.

Now if we look more in-depth in-depth of the ebook, you would notice a few things about the methods he is provided. Few of them are considered to be methods that came off as being rushed or common sense method. Including Reselling of Crypto and accounts.
Methods that are broad and would not work.
Selling virtual items in other marketplaces.

Overall these methods are public methods and have been in multiple sets of ebooks. The value of the ebook is strictly equal to being worth $9.99 on a fair level and maybe for members who have never purchased an ebook in the Ebook Bazaar section.

Final Thoughts
As I mentioned before, the ebook is not worth the purchased, filled with public methods and methods that were probably not much thinking into it. If purchased, your successful rate will be 10%. My overall concerning points areI recommend doing a significant update on your ebook. The methods you provided don't equal the value of the price you are currently offering it for, and honestly, it should be free.
Several grammar mistakes that can be corrected.
You should probably refrain from selling the ebook for a while because it is a compile of public and non-working methods.

Hydraxus - *February 10, 2018, 10:35 am*

Maximalism's Service Review for: "HorusGod's Fortnite Shop | Standard Edition | V-Bucks | Random Levels | Random Items" - Requested by: Horus God
Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your service that you are selling.
Upon reviewing the seller's account, I have found notable information that is as follows:Join Date: 11-09-2010
Time Spent Online: (N/A)
Reputation Count: 514 (Positive: 214/217 / Neutral: 0/217 / Negative: 3/217)

Deal Disputes / Community Alerts: (https://hackforums.net/showthread.php?tid=5678071)
Detailed Review:
Upon reviewing this user's service, one of the first things I noticed is this user's response time. After I first greeted him, he easily responded within ~25 minutes of my first message to him, and after responded in ~10 minutes or less. The user provided me with a copy of multiple accounts which all seemed to be working. The accounts were clearly of higher quality, however, it seems likely that the account's subscription could expire. To fight this, the user provides replacement accounts to all accounts which had run out. I personally believe that this service is one-of-a-kind, and have yet to see another service as such on HackForums.
The overall price determined by the of each account is fitting for the service, and honestly, in my opinion, a steal. The price of each account is as follows:
Random Account with random levels and items: $1.00
Standard Edition Account: $5.00
Battle Pass Edition Account: $4.00
Good Items Account: $1.50
V-Bucks Edition Account: Custom
Overall, this user's thread was properly set up, however, one recommendation I would make is to purchase a thread design. A thread design would help to please the eye of customers, and could easily be a driving factor in whether or not someone purchases a product.
Final Thoughts:
As I previously mentioned, this user's service is fitting, and his prices are a steal. The overall quality cannot be determined, however, his / her response time most definitely makes up for it. Below are some key points regarding this user's service.Purchase a thread design. This not only attracts customers to your thread but also helps to show you care about how others perceive the quality of your service.
The price of each account is great for what you're getting. I noticed in the T.O.S. you stated you could change the prices for the accounts at any time without question, I would highly recommend not to change it because it could possibly drive a decline in customers.
Although I have stated multiple times that this user's response time is great, it could definitely be improved. Having an average response time of ~5-10 minutes would definitely be better as opposed to ~25 minutes.

Maximalism's Service Review for: "[24/7] PROXIES24.com >> << BIGGEST PROXY DB >> << VERY CHEAP >> << SOCKS4/5 & HTTP >>" - Requested by: Sickness.
Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your service that you are selling.
Upon reviewing the seller's account, I have found notable information that is as follows:Join Date: 12-16-2016
Time Spent Online: 2 Months, 23 Hours, 27 Minutes, 35 Seconds
Reputation Count: 424 (Positive: 201/213 / Neutral: 4/213 / Negative: 8/213)
Open Deal Disputes / Community Alerts: N/A
Detailed Review:
After having messages sent back and forth between this user and me, one of the first things I noticed was his / her response time. Regarding this, I would say that the user's response time could definitely be improved. It simply could be timezone issues, however, the user has not been online for 12+ hours since the date of this post.
Regarding the user's actual service, I noticed that the website is clearly custom-made, and the design is overall great. The user clearly has taken mass amounts of time to develop / have someone develop his site, as well as design / have someone design his thread design. The user has provided a step-by-step tutorial guide on how their website works via YouTube and has multiple options of contact with an auto-buy system setup for ease of use.
Now, let's talk about the actual quality of the user's proxies. Overall, I noticed that the proxies were all they stated, and are of very high quality. I personally had no issues to test with the support team,

but from my personal experience dealing with the user, I would say that the support team is more than likely a group of highly qualified individuals to answer any questions hand-picked by this user. As for the pricing goes, I believe that this user's prices are unbeatable. The pricing goes as follows:
Weekly Plan: $4.99
Monthly Plan: $7.49
Yearly Plan: $45.99
Comparing these prices to other user services, it seems as if the prices are great. Many of the users here on the forum price their proxies based on each proxy rather than a specific subscription with unlimited prices. This user instead, decided to take the subscription route, and it seems as if he is doing substantially well. Additionally, you need to take into account that every proxy is checked on an hourly basis, with thousands of proxies ready to use.
Final Thoughts:
Overall I believe this service is very high quality. The user has taken the time to make his service the best it could be more than likely investing $1,000+ into the overall project. The user's response rate definitely needs to be improved upon, however, that is the only negative I can see with this specific service. Like I said previously, I believe the actual site's support team is not simply one person, rather other qualified individuals. There aren't many things you could improve upon at this point, but something I would highly recommend is to purchase a sticky in the Premium Sellers Section to help gain more customers.

Asileux - *February 13, 2018, 9:49 am*
To be honest, it's annoying as hell to see you guys on all the threads asking to review products.

Galaxias - *February 13, 2018, 10:04 am*

Galaxias' eBook Review for "How to build your own SMM Panel - Premium", copy provided by Anima Core

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.
Product Link: https://hackforums.net/showthread.php?tid=5795446

When I am reviewing your eBook, these are the following things I have looked at and will be followed up in my post later.Presentation of information and clarifications if necessary
Your content originality versus known content
Difficulty of setting up one's own panel versus utilizing one
Cost of the product versus actual worth

As I dive into the eBook, I already felt the load of content presented in this book, slapped in my face (but not in a bad way). When I look at the content that you provide throughout this very lengthy 8-page guide, I find that it's an extremely informative read about how an individual can start their own SMM panel. As you mentioned in your thread, you are selling a product that provides information on starting an SMM panel, and my am I pleased to see the amount of effort and detail in this and how much new knowledge I've built around getting an SMM panel started. What I like about your eBook is that you provide a table of content, which allows reader(s) to be prepared to follow the information that's going to be presented as they go down chronologically. Also to mention, by separating each topic into their own "chapter", it makes readability fairly easy and no hassle at all. It's a simple and plain yet good format that helps us digest the information and not get plowed with different topics all at once which some methods do.

I would like to first mention that I am someone who has very little knowledge of how SMM panels work and was interested in starting up one in the past but no idea how nor the resources to find out how. However, after reading this product provided by Anima Core, I can safely say that now I

understand how such a process works and that I could potentially become a SMM panel provider one day (I highly doubt it, I'm a pretty busy person). What's great about this eBook is the resources, without those, this eBook would be worthless or useless to those who have no other guidance on how to utilize the knowledge that is gained from the content. Given your amazing ability to be detailed and make things digestible, I'd give you a pretty great rating of presentation of content and given that the resources and recommendations you make in the method, it's a rating of 9.1/10.

Furthermore, I also went ahead to check whether or not the information in this product is similar to others, and I can confirm that this is indeed a unique product. However, given that SMM panels are a very popular type of service being offered on this forum and elsewhere, it is possible users may know of how to run one, in which case this thread should mean nothing to them. However, for those who do not, of course, this is for them. But, my point is that there are indeed information that can be common sense or something one can come up with by just thinking critically on the process. Nonetheless, a very unique product and it's fairly lengthy and detailed.

As for setting up one's own SMM panel, I'd say its fairly simple. You need only a few things, a website, host and utilizing the resources provided in the product. That isn't so hard is it? I don't think so. However, take my word as a grain of salt because I did not personally setup my own SMM panel, I don't have the time for that. But, it seems relatively simple to do. If anything, all questions can be answered by the seller!

And finally, the price versus the content that is being sold... most definitely can say that the information for $20, is useful because as I've said repeatedly, THE RESOURCES!!! so much of it is very useful for you in this scene. Utilize it well and you can easily make a great turnover of your investment.

FINAL THOUGHTS

For users who have no background in knowing how to start a SMM panel, I can safely say that this eBook is one good purchase for the given price that its set at to start your own SMM panel. The eBook itself provides a hefty amount of resources, suggestions and tips that will help push your ability and presence in the social marketing field to sell whatever it is that you can do in this field. I would also like to note that it requires a great deal of time investment but I don't think it'll be too much.

So potential buyers, if you are one of the following...
> Aspiring to become someone involved the social media marketing field
> Have the patience to setup, invest and work rigorously to setup your panel
> Persistent in not giving up when things get slow or are slow
> Understand the risk factor of setting up a SMM panel, due to competitiveness but can withhold such obstacle
> Are not familiar with the market of panels but wish to get more information and learn about SMM panels
> Are not familiar with setting up panels but wish to learn how to get started

Then this product is something you may or may not wish to check out. It's a fairly lengthy book with great suggestions, tips, and information on different types of resources you can utilize but nonetheless, great work.

Again, thanks for allowing Appraisers to review your product and I do heavily apologize on my behalf for such a delayed review on your product.

Requested Appraisal - "7Elven Generator - Requested Appraisal by "the6ix"

Before I begin my review, I would like to thank you for allowing us ("Appraisers") the opportunity to review your ebook.
These were the following things I have observed and looked at while doing this review and will end with a follow up on my post later.
Let's talk about the person sales thread. We understand that the information is there, everything included from describing the necessary information, how the accounts are used and what is the purpose of them.

Although the information is there, the design is not. There is no thread design used for the user. Although it will not affect the review, it will be a consideration in getting a thread design made for your business. It will not only boost sales but will cause members to take you more seriously with the product you're selling. Especially when it comes to a majority of the members on the forums that only look at the design of the sales thread.
The pricing of the product is $5 access to the generator, with the accepting Payments of Paypal, Bitcoins, and Ethereum.

Although its $5, its missing information on whether its a lifetime product, monthly or even weekly purchase. That info is critical when it comes to the product like these when they deal with accounts. That's being said let's talk about after you make a purchase to the reports.

Now for the Website

The idea of having the product to be sold through an online website generator is very resourceful. Reasons why I say this is because they're a lot of users who create a programmable generator which will only be supported by one or two operating systems. Using a website based generator will allow customers from all sources to be able to gain access to the product.
The site is very sleek, and I love the dark design. Everything was well thought out. There is an option in the sidebar of the site that says Mass Generator and I like the idea of it. Being able to print out a certain amount of accounts depending on the number you put in is a nice feature.
Everything on the site was arranged intoThe Dashboard
Generate Accounts
Mass Generator
Purchase Tab
Information Tab
Contact Tab
Very detailed and straight to the point is what customers will love to deal with when it come's to this product. My overall favorite thing I like about the site is the Stats. Showing the number of accounts and points generated in real time while having the servers showing on the right side. It shows the worth of the site.
Spoiler (Click to View)

Final Thoughts

As mentioned before, the more information you place on your sales thread, the better. Invest in someone to create a thread design for you. Not only will it boost your sales, but customer will understand that you're serious about your product. Purchase an informative thread design.
Place more information on the thread, for example you can do a Q&A for common questions people will ask you about the service and have it placed underneath your thread.

Other than that, this product has my approval.

Galaxias' Service Review for " 24 Hour | US Residential Proxies | Other Countries Available", product provided by SneakerSource

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your service.
Service Thread: https://hackforums.net/showthread.php?tid=5792296

When I am reviewing your service, due to the lack of interface for your proxies (e.g. a website), I am only able to provide my review on the following things.The quality of your proxies (fast, reliable, described as sold)
The price of your residential proxies compared

Firstly I would like to thank you for providing well over 150 residential proxies for me to use. It was more than enough to suffice to test the reliability of your service, the speed, as well as whether or not they were indeed residential proxies. You responded in a timely manner answering the many questions I had about your service when I offered about reviewing it. You responded in a fairly quick manner and that shows you're serious about your business and that you wish to give your customers a great experience in buying from you. Because of my busy schedule I also notified you about extending the length of time of me utilizing your proxies, because, I was pretty caught up with work and school so, you did. That was kind of you.

Anyhow, the format that you sent the proxies in were very clean and simple (user:pass@ip:port) which allowed for easy copy and paste usage. And I went ahead and by hand, actually test over a few dozen proxies (unfortunate I was unable to utilize all your proxies as they would actually take me ages at the time I used them). They were incredibly fast and I had no problem browsing and searching the web with them! Each and every one of them lasted for a fairly great amount of time compared to previous service(s) I have used on this forum. Shockingly though, I was kind of disappointed that on some sites, it can pick up the proxies to be from a server (Cloud*********) but other services pick them up as a residential IP but in short, they are indeed residential proxies in most cases. Furthermore, you also extended my service, which means they last for a fairly long time, like I mentioned just earlier.

For the price that you're offering your service (or well product) of residential proxies, I believe it's at a very cheap price. Given that many sites online sell residential proxies for well over $1-5 dollars for high quality ones, these ones are very cheap and can be used for an extensive amount of activities online. Whether you want to mask your IP, safely bypass a website's IP ban, or anything related that would require you to use a proxy, this is for you!

FINAL THOUGHTS

I noticed, or I do believe (but correct me if I'm wrong), that you are doing this service by hand rather than automated. My only suggestion is to possibly consider opening a website which would make the process much faster than having to wait certain times for you to be on to buy, get and use the

proxies. It can be very annoying to wait for this when during certain times, users may need it instantly or as soon as they can but would then have to wait for your availability.

Nonetheless, I can confirm that you are indeed selling very reliable US residential proxies that last for a very good amount of time (on average well over 10 minutes).

Again, thanks for allowing Appraisers to review your product and I apologize for extensive waiting time for this review.

DoctorSheep Service Review for "WeLeakInfo.com" by "WeLeakInfo".

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your service.

First of all, I want to talk about the reputation of the service. "Weleakinfo.com" has become a considerable resource around multiple forums. They're the only database search engine that was able to get a lot of reputation in a short amount of time-based on the amount of growth it has gone through this past couple of months. If we look up the history of "Weleakinfo.com," you noticed that their foundation sold on several different forums. They are not only spanned on Hackforums.net
Now if we were to talk about the sales thread, the information is there. It's stated to be "The world's fastest & Largest Data Breach Search Engine." based on that statement, you have to be bold and have proof that has that stated on the forum. The thread design is very informational and straight to the point. Between the plans, API Pricing, and Payment Methods. If you compare pricing to other sold databases, this is a great deal.

Packages IncludesSimple - $7 - 1 Week Access.
Pro - $25 - 1 Month Access - 10 API Searches.
Elite - $70 - 3 Month Access - 50 API Searches.
You also have the option to purchase a Lifetime Access, only if you're interested.

Payment Methods accepted are Paypal
Bitcoin
Bitcoin Cash
Ethereum
Litecoin

The Website

Everything suitable for all customers interested in purchasing the membership for this Database.
Second of all, I want to talk about the website. If you click the website, It will take you to the official site: weleakinfo.com.
The site is very straightforward and not hard to understand. Everything is label correctly, and that's the expectation I have when it comes to online databases.
WeLeakinfo.com was kind enough to provide a trial version to test out, and I am highly impressed. The database tabs show a list of all the databases they have inserted into the search engine and continuously growing. Right now as I am posting this review, they have a Total Database of 2,474 all from different sites and time frames. Usually, several online databases don't provide that much information on the type of databases they have which can cause a lot of confusion, but WeLeakInfo was able to give the list, which shows how much confidence they have in their product.

Now, everything arranged between Support, API, Purchases, Lifetime Purchases, and

Miscellaneous tab, which holds information including site privacy policies and terms of service. When we want to begin using the service, the search engine divides the type of information by a set category. Username
Email
Password
Hash
Name
IP Address
Phone Number
I type in several names and the results it provided.
The search engine has a time interval set to show how fast it was able to look through the database to find information on information I provided and which database it was located out it. Information was accurate and very informative. Although I was not able to look through everything since I was on a trial account, it was enough to write this review.

Final Thoughts

Finally, I will say that this service I can see it going a long way and getting several customers in the future. I can't wait to see where this goes and glad to be able to review this product. I can even see myself as a customer in the future.

I can approve this product. Good luck with sales mate.

Galaxias' eBook Review for " SocialCracker < CRACK ACCOUNT WITH SOCIAL ENGINEERING", copy provided by Motley

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.
Product Link: https://hackforums.net/showthread.php?tid=5794571

I would like to firstly apologize for the long wait for this review, I took a 1 to 2 week break in order to focus in school but now I have returned to do my work. Secondly, I would like to mention that I attempted this method but due to my amateur skills in this area of practice, I had failed miserably but it was a good experience and test.

So... as for your sales thread, you have stated the following things:The difficulty to execute the information you provide is easy
There is no necessary investment needed
Initial time investment required is less than about one hour (highly dependent on the individual)

Your statement of which the method requires little to no skill is indeed fairly true. However, keep in mind that this does require some basic communication skills because it requires social engineering in order to entrap your victims. If you are unable to properly communicate with your victims into doing the basics of the steps that are provided in this guide, you will have a difficult time succeeding. However, even with the lack of good communication skills does not necessarily mean that you will fail this method because of the following...
A large portion of the population are extremely naive and not the brightest
Many people are materialistic, making it easy to entrap (a sample case scenario of using a niche to entrap your target)
Some people don't care about how you communicate to them, making it simple to trick

Those are the top 3 I can think of. Anyhow, moving onward with the investment. As stated in the thread as well as your guide, you've suggested that it does not require any sort of investment, as there are various types of resources online that can be utilized to make this guide work. I can confirm that this is true, HOWEVER, I do believe even a small investment of $10 or less can be well worth it if you are planning to do this long term or at a bigger scale. I'm not saying that you should, but by using one's creativity, this can be done in a bigger scale. Needless to say, being creative if one plans to purchase this guide, can go very far.

Next, the amount of time required to setup this would be fairly lengthy, at least an hour if anything, but if you're quick then you can probably get this setup in less than half an hour. However, that goes to say that I can tell this requires a lot of time invested in order to succeed. That means, time to communicate with your target, time to setup the entire thing to get your target to go to, and getting into their accounts. All of which, requires effort and time.

Nonetheless, a great written guide and below I will give you my final thoughts.

FINAL THOUGHTS

As for my final thoughts, I can, again, confirm that the statements made by the seller is indeed all accurate and true. The method requires little to no skills besides the basics of communicating, requires absolutely no investment (well only investment would be buying this guide), and some time to put into setting everything up. That being said, if you're a user who's interested in finding the simplest way to trick people and getting into their account(s), this guide may be for you. I'd also like to note that the price for this guide is fairly cheap which, is a fairly good deal.

Again, thanks for allowing Appraisers to review your product and I hope you are very satisfied with my review.
