Thread: [How to use search function ?](#)

Canadian - February 2, 2018, 11:00 am

I know this seems extremely stupid, but I'm having a hard time using it. I am looking for .edu email threads, and I managed to locate 2 without the help of the search function that are recent, but when I search to find more, it only gives me threads from 2009-2015, I'm not sure why. A search function for dummy guide would be extremely useful.

I believe that is because you added the period when searching. Try it without and you should get the same results.

MyBB doesn't register the . in URLs or searches I believe (I could be wrong).

Oh! It seems a lot more searches came up when I did that. That's an interesting finding

Here is a thread I found for you where he is giving away free edu emails:

Search ALSO requires a minimum char input, my guess is you were not meeting the correct input, or terms, thus not getting the results you wanted. ?

Canadian - February 3, 2018, 4:46 am

Thank you very much guys. I have been using it to get to the threads I need.
