There's no autoplay feature for the videos. You have to manually click the video button, wait for the video to finish and then manually close it out. 10 points equals a penny and the videos on average are only paying out one point.

It depends on your location, If you're from US u can choose EngageMe.tv .It supports autoplay feature, and every 3 ads (average 3 min) u watch u will get 4 points. If u are good on phone farming u can make a good profit.

PM your id to get my private method if you have signed up using my referral.

Hey deebxx, I'll love to see your method. Why can't I find anything about this topic anywhere here on the forums?
