Thread: [YouTube watchtime {mute video and leave running in background}](#)

Herbert - February 3, 2018, 11:40 am

I've seen a lot of activity recently in this section working on subs and watch-time based on the new changes of the YouTube Partnership Program.

here is mine.

[Video: <https://www.youtube.com/watch?v=-3ctO0rF3sw>]

just mute the video and leave it running in the background, I had no shock mount during that time so you can hear my keyboard quite loud ?

I'll try to help as many people as I can, link me your longest video and I'll run a tab in the background on mute so you can gain some hours <3

If you don't need watch time I also have other various rewards to offer, or other gestures that you may need that I can do!

I've also made a dedicated discord where you can promote your channel also feel free to do it down below.

This is such a great idea bro!

I have done this for you John Herbert! I dont have a YT channel but am happy to help any with theirs as I do understand the struggle. Good luck with your YouTube and my advice is to just keep making videos and keep trying to improve them. Dont let anyone stop you.

Let me know when you receive a plaque from YT. :)
