STILL WORKING AS OF FEBRUARY, 2018

2/3 VOUCH COPIES GIVEN

(Feb 4, 2018 05:25 AM)@Vincent Wrote: [\[CITE\]](#) Got a vouch copy, the checker is pretty fast. Price is a little high for a checker in my opinion, would suggest lowering it a bit.

Program works good. Checked over 500 accounts in a very short time.

If you need a checker, this one is for you :) (Feb 3, 2018 01:03 PM)Rezy Wrote: [\[CITE\]](#) I'll take a vouch copy, just started cracking and don't have a netflix cracker,

Thanks.

One of the best checkers i have ever used, been cracking for a while now and must say this is extremely fast and works well.

currently checking around 2,7million accounts and the program can handle it fine, Easy to extract your hits out and to find them.

Huge vouch for OP and recommend anyone looking for a cracker to buy this. (Feb 15, 2018 11:21 AM)Taylor Wrote: [\[CITE\]](#) Vouch for this guy, program runs smoothly although does "Stop working" and auto closes if left on for a few hours.

Nice program :)

I have released this program before but that was full of bugs overall bad. i've since recoded and designed a version 2.

iBox - February 8, 2018, 4:35 pm

looking to buy msg me when online!

added you to skype ... waiting on reply

anyone having issues with this ? or is it just me ..

so i bought the program from Grey, soon as i downloaded it and moved it into a folder i got this

how ever he gave me an explanation for this "that's because i used an obscurer to hide the code" .

so i turned off my av & tried out the program first time i loaded 4k of combos (email:pass) and my own private proxies (bought) nothing happened . i was told to use his proxies so i tried that and it seemed to be working however it was jumping from 1400 to 1900 within a few seconds so i knew there was an issue .

i decided then to create a smaller list with random combos and a valid account (16 in total) i started the bot again nothing happened i then had to close the program and re-opened it got it working again however it did not give any valid outputs and when the status got to "checked: 16" it just continued right up to 40 + however i only loaded 16 accounts so not sure why that happened i have spoken to him about this but will be looking for a working version or a refund . i would hold off any purchases until its working better

1. Sorry for the late response i have had a lot of stuff to do with school and haven't had time to check HF or PMs.

2. The virus detections are all invalid. They're caused by ConfuserEx, which was used to protect the executable. Look it up.

3. The reason it is skipping checking accounts is because of the amount of threads. it is too high, i recommend turning it down, although it can be slower at checking.

4. To my knowledge everyone that has bought my program has it all up and working without any issues, i don't know what is happening on your end and why its not working. will look into it

and i have also updated with a newer version of the software

Now please stop trashing my thread, and deal with me directly on Discord (which you haven't done) as i am most active on there. (which i clearly stated on Slype)
