Thread: [===== \[\\$10\] SocialCracker < CRACK ACCOUNT WITH SOCIAL ENGINEERING =====](#)

Motley - February 3, 2018, 9:42 pm

After you purchase, get \$5 back if you leave a review!

About

I wrote this ebook to teach people how they can use social engineering to hack into peoples personal accounts. The method is easy, free, and takes under an hour to set up. This does not come with any programs, it doesn't need them, and requires only an internet browser.

Vouches

(Feb 3, 2018 11:03 PM)Game Freak Wrote: [\[CITE\]](#) I have successfully received a vouch copy from Motley.

The Ebook itself it very short, concise, and clear.

It hits all the main points.

There is some investment needed in regards to money and time.

Really little money is needed.

Can be extremely successful scaling with the amount of effort put in.

Overall, this is something unique and will work.

(Feb 3, 2018 11:00 PM)Rezy Wrote: [\[CITE\]](#) I have read over the ebook and here is my detailed review:

Firstly i am going to say this is one of the few ebooks I've bought/received a vouch copy that i am actually going to try, This is surprisingly easy to do and extremely successful.

The method itself is 9 pages long, but defiantly not boring, He leaves out all the unnecessary stuff and only tells you what you need to know, it's well set out and noob friendly, He also includes multiple links and picture examples to make it so much easier.

The method also gives you alternate methods of doing it which help a lot, incase you want to switch it up a bit.

This is the first method i've reviewed that doesn't lie & actually works. Set up time is around an hour and success rate just by reading over it is probably about 80%.

Thanks for allowing me to review your method, and i highly recommend anyone looking for crack personal accounts or any accounts in matter of fact, to buy this, it is defiantly worth more than \$10.

I'm also guessing you say unless stuff.

Your comments are not needed.

You're so fucking weird LOL

Galaxias' eBook Review for " SocialCracker < CRACK ACCOUNT WITH SOCIAL ENGINEERING", copy provided by [Motley](#)

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.

I would like to firstly apologize for the long wait for this review, I took a 1 to 2 week break in order to focus in school but now I have returned to do my work. Secondly, I would like to mention that I attempted this method but due to my amateur skills in this area of practice, I had failed miserably but it was a good experience and test.

So... as for your sales thread, you have stated the following things: The difficulty to execute the information you provide is easy

There is no necessary investment needed

Initial time investment required is less than about one hour (highly dependent on the individual)

Your statement of which the method requires little to no skill is indeed fairly true. However, keep in mind that this does require some basic communication skills because it requires social engineering in order to entrap your victims. If you are unable to properly communicate with your victims into doing the basics of the steps that are provided in this guide, you will have a difficult time succeeding. However, even with the lack of good communication skills does not necessarily mean that you will fail this method because of the following...

A large portion of the population are extremely naive and not the brightest

Many people are materialistic, making it easy to entrap (a sample case scenario of using a niche to entrap your target)

Some people don't care about how you communicate to them, making it simple to trick

Those are the top 3 I can think of. Anyhow, moving onward with the investment. As stated in the thread as well as your guide, you've suggested that it does not require any sort of investment, as there are various types of resources online that can be utilized to make this guide work. I can confirm that this is true, HOWEVER, I do believe even a small investment of \$10 or less can be well worth it if you are planning to do this long term or at a bigger scale. I'm not saying that you should, but by using one's creativity, this can be done in a bigger scale. Needless to say, being creative if one plans to purchase this guide, can go very far.

Next, the amount of time required to setup this would be fairly lengthy, at least an hour if anything, but if you're quick then you can probably get this setup in less than half an hour. However, that goes to say that I can tell this requires a lot of time invested in order to succeed. That means, time to communicate with your target, time to setup the entire thing to get your target to go to, and getting into their accounts. All of which, requires effort and time.

Nonetheless, a great written guide and below I will give you my final thoughts.

FINAL THOUGHTS

As for my final thoughts, I can, again, confirm that the statements made by the seller is indeed all accurate and true. The method requires little to no skills besides the basics of communicating, requires absolutely no investment (well only investment would be buying this guide), and some time to put into setting everything up. That being said, if you're a user who's interested in finding the simplest way to trick people and getting into their account(s), this guide may be for you. I'd also like to note that the price for this guide is fairly cheap which, is a fairly good deal.

Again, thanks for allowing Appraisers to review your product and I hope you are very satisfied with my review.

plexy.timex - April 5, 2018, 12:09 am

So, is this method mainly finding a victim and social engineering details?
