Thread: [Regarding: HF Features Broken - Self Close/Open & Memberlist Reputation](#)

Xerotic - February 4, 2018, 11:38 pm

I would like to help with two of the features currently broken from the list.

1. Add Memberlist option to sort by reputation.
2. Fix the Open/Close plugin.

I have created a plugin for the reputation on memberlist page and I updated the Self Close/Open that you originally created and that I updated for you in 2011/2012.

=====

1. Add Memberlist option to sort by reputation.

Traditionally you have likely done this via template edits as you posted about [here](#) back in 2010. However MyBB 1.8 now has a variable \$colspan instead of a static number that you can change. For this reason (and to easier handle template edits) I propose to use a plugin instead of just editing the templates manually.

Plugin hooks:

memberlist_end

memberlist_user

Template edits:

{ \$orderarrow['threadnum'] }</td> changed to
{ \$orderarrow['threadnum'] }</td>{ \$rep_header }
{ \$lang->sort_by_posts }</option> changed to { \$lang->sort_by_posts }</option>{ \$sort_by_rep }
{ \$user['threadnum'] }</td> changed to { \$user['threadnum'] }</td>{ \$rep_user }

Pastebin: <https://pastebin.com/WSVn7iGt>

Pastebin BB Code ([Click to View](#))

The plugin includes:

1. Adding the reputation to the select drop down box.
2. Adding the column to display the reputation in results.
3. Stylizes the reputation based on value (negative/neutral/positive).
4. Constructs a link to the users reputation page.

=====

2. Fix the Open/Close plugin.

This plugin is a little more in depth. Back in 2011/2012 when I was helping Omniscient out at MyBB Central I updated the Self Close/Open plugin. See that thread here:

<http://www.mybbcentral.com/thread-7917.html>

MyBB 1.8 has brought changes and permission bugs have caused some issues. I have resolved the permission issues and made the admin settings page cleaner.

- Permission now checks for all usergroups instead of just primary group.
- Got rid of old close/open buttons with image in exchange for normal <a> tag.
- Add the usual MyBB 1.8 prompt (\$prompt) so there is a confirmation to close/open.
- Changed textbox in AdminCP to the built in 'groupselect'. Much cleaner this way.
- Minor logic adjustments.
- Uses language files.

I have tested it on a default MyBB board that I have for development. I don't think HF should require any additional alterations beyond regular plugin upload/installation because the template edit is pretty non-intrusive. It still uses "Posting" in settings.

GitHub project page: https://github.com/xerotic/self_close

Plugin Code: https://github.com/xerotic/self_close/blob/master/inc/plugins/self_close.php

Just needs inc folder uploaded. One plugin file and two language files (regular/admin).

=====

Hope this helps.

Charger - February 5, 2018, 1:10 am

Hopefully Omni will add the code. It's been like 4 months.

Trust scan is probably gone forever.

Wires - February 5, 2018, 2:51 am

The only actual reason why Omni could use that plugin instead of the code within his original tutorial is this:

- Quote:3. Stylizes the reputation based on value (negative/neutral/positive).
4. Constructs a link to the users reputation page.

Other than that, changing the {\$colspan} variable (don't really need that variable) to the number 8 works perfectly. You've basically done it in your plugin. He'd also have to add in the ahref sort link

Nonetheless, good work.

Steve - February 5, 2018, 8:22 am

Way to take initiative. Some great work here. Hopefully it'll save Omniscient some time and get the site fixed a little faster ?

It's possible to make it come back, don't be negative on such :p

It will most likely get done. The question is when. The trust scan feature was an amazing add-on to the forums. Was most useful to group leaders and when users are dealing in the market place.

Not really, Omniscient has a lot in his plate right now. Just have patience he'll bring back everything as it was also EVEN BETTER.

Also great work Xerotic.

Bluffer - February 5, 2018, 3:01 pm

Awesome job! I really hope Omni adds this to the site so we can have these features again.

Hopefully. I know a lot is going on at once so every bit ought to help.

Ben Shapiro - February 5, 2018, 6:24 pm

Wow.

I'm still sort of new here but some of the dedication towards helping the site I see from users is incredible. Good job man.

Riyu - February 6, 2018, 11:44 am

This is awesome. Nice job Xerotic.

Biggy - February 6, 2018, 2:53 pm

Good job on this plugin as well. Great stuff.

Omniscient - February 6, 2018, 5:00 pm

Self Close plugin not working correctly.

EDIT: Got it working. A few minor adjustments. Good work.

EDIT2: Added your reputation on memberlist plugin too. Working well. Good job.

Nonetheless, good work.

You don't even need a plugin for that.

You can add some js code to stylize them, and a simple member names here. Can be added under the Memberlist Templates, I've done this before.

Although a non-js alternative would be nice, I don't suspect too many people use noscript on here (as I don't think you can rep or avail of some other features without JS).

Glad to see that it was added anyway, nice to have them features back.

N110c - February 7, 2018, 12:33 am

Nice contributions which really improve HF again. Thanks for this!
