This game is definately worth buying. You will see after you will finish it :) unlike those EA and Ubi games with their shitty paid Dlcs

Yeah, it's a steal at its current price of \$20. Hell, the game is a steal at \$60.

It's sarcasm. I've never understood the logic that single player games should be pirated just because you can get the full experience from pirating them. If the game is good, it's worth buying regardless of if it's single player or multiplayer.
