Thread: [FBI targeting RATTers going for children. Some hf members be wary.](#)

apeci - February 6, 2018, 9:52 pm

Background info/unimportant

I was never a member of this site till recently but knew of it. I used to see screenshots in sites I was on where young teens were selling infects of teenage girls and making guides how to infect younger girls. They'd post this to make fun of the site and call people here "teenage skids." I'm not saying that, but usually it was teenage skids saying it. They just wanted to seem cool and edgy so they distanced themselves from being one.

With so many young children online; Older men could easily use this to try and find infections of young girls.

With things heard through the grapevine, I have good reason to believe FBI are working to identify a group of people targeting Jake Paul/Logan Paul and other Youtube vlogger fans'.

They will use: "Merch Giveaways at this Link!" or "Win a day With ____ Youtuber!" and many other ways to infect young females and even boys..

Young pre teen and young teen girls and boys are naive to computer security. Even their parents are. And as many know here, just because someone has Norton doesn't mean they're not infectable, although many may think so.

I just warn, anyone trying to infect "teenage girls" here, selling infections, or making guides for younger girls seize what you're doing. I understand you may be 16 so you think it's okay, but it's not. There's child porn sites that are all hacked webcams of young girls. It's disgraceful. A bad side of hacking.

There's a good chance they're not even American, but if they're in EU or other country that'll co-operate you bet your ass they'll go after them.

How it relates to HF

I don't know they're targeting HF directly but they will obviously be looking on this site for people of the sort. I don't think there's any of that really going on here, since a lot of stuff has been forbidden here over the past few years apparently. (I'm just learning a lot of things I used to hear go on here aren't here as I search, then I look it up and see it's discussion has been banned.)

Be smart, don't do stupid shit. Realize there's a huge dark side to the web when it comes to hacking you don't want to be mixed up in if you have nothing to do with.

If you're a teenager trying to get hacked webcams of teenage girls, or you have the excuse "nah bro, i delete them if they're not 18, i'm no pederast!" just tighten up and be smart.

TLDR: I have a good tip to show that FBI are going after a group of people targeting young children online for infections. While many may target them for CC info and such, since they're easy targets, there is a group or groups targeting them for sexual purposes. I believe young teens on here getting into hacking may get into something they don't want to be involved with targeting young kids for non sexual purposes, or targeting teenage girls their age for their webcam thinking since they're similar age, it's okay. Just avoid it. There's plenty of porn online, and targeting children for financial

information is a cheap shot anyway.

-Apepvvv

Jesse Pinkman - February 6, 2018, 9:55 pm

I'm genuinely dumbfounded. I've never been unable to formulate a reply to a thread on HF before.

Armada - February 6, 2018, 10:06 pm

We have an attempted White Knight on our hands folks ?

Mr.Peanut - February 6, 2018, 10:07 pm

I thought this thread would be a troll. While it was hard to read, it was a serious warning to whoever is behind this, if they're on HF (my version of a TLDR for those who couldn't understand what this was about).

Malicious` - February 6, 2018, 10:11 pm

You should read about what subjects we talk about on HF. It's mostly crypto & lounge discussion.

Even if government instances would investigate HF, Omni would assist them.

Mr.Peanut - February 6, 2018, 10:18 pm

I don't see why people dabble in shit this blackhat let alone blackhat shit in general. (rewarding and/or profitable? maybe so, but the punishments are not worth it.)

Are you trying to call me a white knight?

Sir, you don't know me. If I was a white knight I wouldn't be warning potential child predators of something.

Stop trying to be so edgy on an anonymous forum, buck-a-roo. You're not an edgelord.

(Feb 6, 2018 11:07 PM)Mr.Peanut Wrote: [\[CITE\]](#) I thought this thread would be a troll. While it was hard to read, it was a serious warning to whoever is behind this, if they're on HF (my version of a TLDR for those who couldn't understand what this was about).

I'm new to the forum but not to the scene. I don't know much about OMni or how well he co-operates. I'm just warning people since I have explicitly seen screenshots in the past of people explaining how to target teenage girls with RATS on this forum, in years past.

I think I see where you're coming from. You suspect these individuals to be underage as well without as malicious intent as a pedo (and are trying to save them out of the legal trouble.) - I have no comments on that, but I can see why you made this thread if that's the case.

apepi - February 6, 2018, 10:25 pm

Yes, exactly. I know a lot of people on this site getting into hacking are teenagers. However, child porn/hacked webcam footage is a big market rite now for child predators. It's disgusting, disgraceful, and not what anyone here want's to be involved with. It's easier then ever to target young kids online since they're on the internet more then ever.

You can easily put out a "roblox" hack or minecraft hacked client, and bind a well encrypted RAT to it. Im sure you know this well. This is terrifying for people who work to stop the trade of child pornography. And the ones who take it further - we've all heard stories of young girls being black mailed online to do things for strangers. Like, saying they'll send pictures of them showing their privates to what they thought were other boys their age. It's disgraceful.

I'm going to tidy the thread up a bit and then add a TLDR as I think it's important subject not many know about. I can't say why I think they are trying to target this now, but it is a rather credible bit of info.

Good idea, it might make it easier for users who don't want to read the whole thread. Also look into the extension "Grammarly", it's free. (no offense), but it can improve your grammar while typing.

Apologies, I am working on it. English is the main language I use now but it was not my first so I am far from perfect at it by now.

Mr.Peanut - February 6, 2018, 10:37 pm

No need to apologize man, just a tip to help you with communication and growth in the future.

<https://www.grammarly.com>

There's also a chrome extension that works beautifully.

Omniscient - February 6, 2018, 10:55 pm

This is not an HF security issue. It's an internet security issue. Children should be monitored. I have teenage daughters. I discuss with them proper internet use and warn them about potential problems. I even install monitoring on their phones so I could control their social media usage.

I have a feeling more teenagers are hacked and harassed at FaceBook than HF.

Quote:Be smart, don't do stupid shit.

Duh. But stupid people won't be made smart by internet comments. Bad parents are bad parents too.

Facebook has so many issues with personal security that it's pretty troubling actually. You can't expect a staff of their size (along with a reporting system) to efficiently handle all of the issues from a Userbase that size (more so, the 1% that have malicious intent, which is still huge in retrospect to the userbase.)

Hashflare - February 6, 2018, 11:33 pm

So you spent what seems like 10 mintues~ writing a thread saying that Hackforums "securit" issue because people on here will learn how to "hack" into "young girls or even boys" pc's and then look at their webcam. Thanks OP!

Fudster - February 6, 2018, 11:46 pm

This is a legit thread. But it doesn't really concern HF. Click-bait title to be honest.

Positive - February 7, 2018, 12:13 am

I read the title thinking there was actually something wrong.

Fantod - February 7, 2018, 12:19 am

Few people understand how big of a problem there is with no being careful on the internet. You have so much info out there, yet few seem to care in the slightest.

apepi - February 7, 2018, 9:25 pm

I appreciate a response. I did add I don't think they're targeting HF directly at all, but just knowing I have seen threads here about targeting younger girls.

I don't know you but you seem like a very involved admin. Thank you for your reply.

(Feb 7, 2018 12:46 AM)Fudster Wrote: [\[CITE\]](#) This is a legit thread. But it doesn't really concern HF. Click-bait title to be honest.

I apologize, I did not mean it to be that way but I understand now I should have chosen a a better title.

It's 20.00\$ a month

Kuso - February 7, 2018, 9:41 pm

This is a joke?

HF is straight PG now or close.

Saltpeter - February 7, 2018, 9:44 pm

I'm not sure you know much about the user base of Hack Forums.

CyberStrike - February 7, 2018, 10:42 pm

I say good for the FBI people targeting kids online or real life and more over for dirtbag shit well they are lucky that they end up being arrested I am sure some people would love to get a hold of one of these people and after stomping their eyeballs out that dirtbag is done for the day. I am sure that there are some pedos that are here and I kinda wish OP didn't say nothing because these people don't need a heads up.

Taserz - February 7, 2018, 10:44 pm

Don't fucking be sexist. They target young boys too. All young children. Pedos are fucking sick

Mr. Robot - February 7, 2018, 10:46 pm

If the government was serious about tracking down these kids who infect for the purpose as in OP they would have them the same day that they started looking.

Not sure if they are playing the long game, have better things to do or just suck at their jobs.

If they need some tutorials, I am happy to sell them ebooks on how to track kids down using the resources we have, and even put in how to track these people using resources they have.

Ps. Any agents looking to ask legitimate questions, PM me on here using privnote or another medium for offsite contact and i'll be happy to assist you in your investigations.

madvib3zzz - February 7, 2018, 10:53 pm

That was well some troll read.

Taserz - February 7, 2018, 11:07 pm

This guy is the kiddie porn king apparently!

I am kidding don't kick his door in.

But this thread seems pointless le do their job and are on their shit.

Fantod - February 8, 2018, 1:42 am

Lets be honest here. The entire point to the OP was to tell everyone the FBI is doing the job they are suppose to be doing.

If you are going around infecting people, children or anyone for that fact you should face the consequences.

Put aside the reasons or objectives as to why people are doing this, accessing someone elses machine without their consent is still nothing more than a gross invasion of personal privacy.

Mr. Robot - February 9, 2018, 9:44 pm

Too true but it doesn't change the fact they aren't doing their job well enough when average people can find others with over 10,000 clients with little more than a bit of reputation on a forum.

CinemaSins - February 9, 2018, 9:47 pm

This is not good for those people targeting ROBLOX users and their robux! Oh NOEEES. :(

Brill - February 9, 2018, 10:29 pm

if people are deliberately targeting young girls then i think they should be exposed and arrested simple as that. pedo's are pedo's and nobody should tolerate such degeneracy anywhere near malware.
