Thread: [SQLi HELP Plsssss Not getting vulnerable column!!!](#)

aravindor - February 7, 2018, 3:08 am

Not getting here , The number of columns are 35 , When using Union statement page doesnt show the vulnerable column,

URL Here

[pastebin\(.\)com/HNWWTJup](#)

Not showing any vulnerable columns ... pls help

? ? ? ?

w0rd - February 14, 2018, 5:12 am

There isn't a vulnerable column, its going to be a blind / time-based injection.

w0rd - February 14, 2018, 5:13 am

Posted twice, either my connection or HF is laggy af today

pishicat - February 14, 2018, 6:23 am

hi...

It has vulnerable column!

you should do some work for convert a column to multiple query ! if you do that one of columns is in source . for other columns you should use multi query ..

and inject the second query for show the vulnerable columns!(some of they will be in source)...

I think another person was asked it here ..

I don't need to showing me big by this method...

i want to help you and go to learn ... nothing never be found without trying !

proof : [s8.picofile . com/file/8319414900/asasad.JPG](#)

good luck ..

aravindor - February 15, 2018, 4:37 am

Okay, first of all thank you very much. I just went through some GHI tutorials about Routed Sql injection , tried some live sites from examples too.

But when I tried to do it in my URL.

my first problem is i'm unable to terminate statement by adding

[pastebin\(.\)com/uNaB1TVh](#)

Every time I get a blank page.

and I leave it there and try to do routed sqli like

[pastebin\(.\)com/SHAH0Qqz](#)

still blank page...

I spend a day here looking for solutions and don't know what I am doing wrong...

I'm not asking you the direct solution, but if u could just point out what are the things I should look , then it will be great . thank you very much

Disparity - February 21, 2018, 6:39 pm

Looks like a time-based injection. If you need help exploiting it send Janus a PM, he knows a ton about SQLi.

<http://securityidiots.com/Web-Pentest/SQL-Injection/time-based-blind-injection.html>

aravindor - February 27, 2018, 7:10 am

@Disparity Yes I thought first , But 'Phishicat' showed in his answer that it is possible to get the vul column by multy query injection...

linhtinh - April 4, 2018, 4:55 am

I think another person was asked it here ..and got same result like this topic ,nothing lol :))

linhtinh - December 27, 2018, 11:47 am

Try change column 13 to 1(or true) ,and routed query in column 3 .

and false +Un*IoN+Al*L+SeL*eCt+1,2,Routed query

here,4,5,6,7,8,9,10,11,12,true,14,15,16,17,18,19,20,21,22,23,24,25,26,27,28,29,30,31,32,33,34,35,36-- -&cid=gxatbulpxszmiq&paged=710
