Thread: [How to make exe to pdf, jpg, png, rar...](#)

nyx322 - February 8, 2018, 2:18 pm

Hello everyone, today we will cram unbreakable, namely we will shove your viruses in the formats JPG, txt, PSD, etc., while it will look like a real Jpg and next will write that it is a jpg picture (similarly with other files!)

And so, that we need

-Winrar Archiver

-JPG

-HxD [Download](#) (didn't find official site, so i uploaded it on Dropbox, if u scare to run file just try it in vm, official page of program -mh-nexus.de/en/hxd/) [VT](#)

So

1. Install HxD and throw its icon in the folder with the virus

2. Archive the virus, with the usual settings, just zip this shit into the Zip format.

3.And so we have at the moment, the archive with the virus of the format .exe

Now take this very Archive and drag it to the HxD icon

4.Open this window where we see all the code, then go to the tab Search> Find or press Ctrl + F

5.Write into the search box "Full name of your virus.exe"

We are looking for it, it will find 2 entries, one at the very bottom and the other on top of the code, we need the bottom value, so do not confuse it, then change exe to the extension that is needed, I changed it to Jpg

Now we save all this, and open our archive, and see this picture

TOTAL - As you see it is displayed .jpg, next to the Type tab it says that this is a JPEG image ?

Not mine article, just translated from one of russian forum.

Fixed download link of HxD

rogueblade - February 8, 2018, 3:00 pm

very nice work!! thank you will it still execute?

nyx322 - February 8, 2018, 3:15 pm

(Feb 8, 2018 04:00 PM)rogueblade Wrote: [CITE](#) very nice work!! thank you will it still execute?

of course, but can have some problems with rare extensions like .bin .iso

I checked only .psd .jpg and .txt

rogueblade - February 8, 2018, 3:38 pm

(Feb 8, 2018 04:15 PM)nyx322 Wrote: [CITE](#) of course, but can have some problems with rare extensions like .bin .iso

I checked only .psd .jpg and .txt

i will try some other extensions if they work i'll post them, thank you for the research on the thread.

CyberStrike - February 8, 2018, 11:38 pm

msfvenom you can use the format and raw then > bin . You can actually use polyglot to have an actual image generally png/bmp which can run shellcode or a powershell script as well. Over all interesting.

Hacking Team - February 9, 2018, 2:44 am

Looks interesting. Have you tried it? It works? Maybe this flaw has been patched in the newer versions

EDIT: This bug has been patched, it does not work anymore

vladd - February 9, 2018, 5:20 am

it's looking good, i need to try it out and see and give feedback

Still working, just created new png file few min ago

MrDickFeynman - February 9, 2018, 9:39 am

(Feb 9, 2018 06:21 AM)nyx322 Wrote: [\[CITE\]](#) Still working, just created new png file few min ago what payload format did you use? i just tried with exe to jpg but it didnt work..
the original payload works but after changing hex it doesnt

nyx322 - February 9, 2018, 9:43 am

(Feb 9, 2018 10:39 AM)MrDickFeynman Wrote: [\[CITE\]](#) what payload format did you use? i just tried with exe to jpg but it didnt work..
the original payload works but after changing hex it doesnt
I think you changed the first found file name you should edit the last one at the end of code

Hacking Team - February 9, 2018, 10:54 am

(Feb 9, 2018 10:43 AM)nyx322 Wrote: [\[CITE\]](#) I think you changed the first found file name you should edit the last one at the end of code
We have changed the last one at the end of the code. Why didn't it work?

nyx322 - February 9, 2018, 10:57 am

(Feb 9, 2018 11:54 AM)Hacking Team Wrote: [\[CITE\]](#) We have changed the last one at the end of the code. Why didn't it work?
dunno, try to reinstall HxD

Hacking Team - February 9, 2018, 11:05 am

(Feb 9, 2018 11:57 AM)nyx322 Wrote: [\[CITE\]](#) dunno, try to reinstall HxD
We will try to reinstall HxD but we are pretty sure that this bug has been patched in the new versions of WINRAR. We will come back to you shortly.

MrDickFeynman - February 9, 2018, 2:21 pm

(Feb 9, 2018 11:54 AM)Hacking Team Wrote: [\[CITE\]](#) We have changed the last one at the end of the code. Why didn't it work?i'm sure i took the last one

nyx322 - February 10, 2018, 7:13 am

(Feb 9, 2018 03:21 PM)MrDickFeynman Wrote: [\[CITE\]](#) i'm sure i took the last one
Then may be guy above right, an you should try it with earlier versions of winrar, let me check mine version

EDIT: You need to have fourth version of winrar

nyx322 - February 11, 2018, 11:33 am

It's still relevant. With fourth version of winrar

(Feb 9, 2018 03:21 PM)MrDickFeynman Wrote: [\[CITE\]](#) i'm sure i took the last one
Did u make file? Coz it works for sure checked it on two pc's

nyx322 - February 14, 2018, 7:46 am

Can make your file to proof

W3 S33 4LL - February 14, 2018, 8:14 am

noiceeeeeeee

ggggggggggggggggggggggg

Smile? - February 14, 2018, 8:17 am

Whats the chance of it to run normally ?

nyx322 - February 14, 2018, 9:39 am

(Feb 14, 2018 09:17 AM)dåFu™ Wrote: [\[CITE\]](#) Whats the chance of it to run normally ?
70 % some steallers conflict with dis method

No problem

SREE - February 21, 2018, 10:49 am

tried this and the format changed inside the zip. but when opening the file it opens with windows picture viewer and not executing the exe. (same with pdf it opens with ad reader and not executing any exe.) . guess this is only for changing the extension and putting it in the showcase :P

nyx322 - February 21, 2018, 12:12 pm

Professional - February 26, 2018, 6:30 am

Hello sir,

would you like to explain something about this?

Please explain me about processes those are highlighted in the image shown above which are dropping along with the main setup/installer file.

mrhappycoder90 - February 26, 2018, 9:54 am

Ohhh my... Is that a RAT I see xD

nyx322 - February 26, 2018, 12:59 pm

Waiting for your feedback, happy you like it

Ashley1988 - March 7, 2018, 7:52 pm

This bug has been patched, it does not work anymore

nyx322 - March 12, 2018, 1:07 am

(Mar 7, 2018 08:52 PM)Ashley1988 Wrote: [\[CITE\]](#) This bug has been patched, it does not work anymore

Use 4th version of winrar

99slayer - March 13, 2018, 6:08 am

With this, can I make it appear as a PNG or JPG file, in such a way that it will open a picture? if so, how do i do this, and allow a worm to execute on the computer. thanks

nyx322 - March 17, 2018, 5:53 am

(Mar 13, 2018 06:08 AM)99slayer Wrote: [\[CITE\]](#) With this, can I make it appear as a PNG or JPG file, in such a way that it will open a picture? if so, how do i do this, and allow a worm to execute on the computer. thanks

Yes, but it's going to work only if the user start file from archive if you for example first put file on desktop and then run it's going to be like exe, not other extensions

There is no bugs just use 4th version of winrar

nyx322 - March 23, 2018, 3:38 pm

I think you changed the first found file name you should edit the last one at the end of code

ph470m - March 23, 2018, 9:52 pm

This is quite interesting!! Thank you!!

Sethmumu - March 24, 2018, 1:57 am

Did you tested and it's working perfectly on the RATS/Keyloggers and so on? Does it corrupt the stub?

undergee - May 30, 2018, 6:30 pm

Does this still work? Don't wanna waste effort if not working

astalavista - August 30, 2018, 4:22 am

Not able to download, link "files.catbox.moe/mr9cpo.rar" error 404 not found!!!

m3t0 - August 30, 2018, 6:13 am

The download link does not seem to work, may you update it please

maxm22 - August 31, 2018, 5:41 pm

Thanks for this. much needed :)

qingo00 - September 1, 2018, 1:17 pm

Nice, i was searching for this, hope it works.

steful - September 4, 2018, 6:01 am

DI link:

<https://mh-nexus.de/en/downloads.php?product=HxD20>

mosh_b - September 4, 2018, 11:40 pm

Nice, but it is not runnable because it's only exe with jpg/pdf.. extension.
the photo viewer will not run the file.

pharmol - September 6, 2018, 8:33 am

thanks for this very great tutorial

Savageee - September 6, 2018, 3:32 pm

Looking great man!

Posting, so i can find this thread later.
