Thread: [Botnet Rent](#)

Devils Bed - February 8, 2018, 9:03 pm

I'm looking for someone that owns a botnet and willing to share it with me for a monthly subscription. I just don't feel like doing the work to be honest. I have the money...name the price and i'll help you out on it..if...only if..i have access to some features. Now i don't think i'm breaking the rules for asking this..there's a botnet tab on HF...and it's not a ddos for hire, so i think i'm okay asking this,but i'm not really sure.. If i am breaking the rules guys just let me know and i will remove this thread. please no negative comments if you can lol if so i guess i can just ignore you. PM me if your interested or just comment..whatever. it can be IRC or IoT. thanks. ?

Be careful so you don't get scammed. What is stopping you from renting it for 1 hour and upload your own bot? I bet no serious herder will sell you this.

I'm aware...Thanks for the look out though. I don't see why anyone would scam me though unless they say they have one and really don't .i'll be willing to pay them for a monthly sub. I just want one feature on the botnet and that's it. I'll only use it for one thing and one thing only...but you are probably right...it's gonna be hard to fine a big farmer to cut me in. you gotta buy the servers and the scripts to go with it, if i want my own but i just don't feel like messing with it right now. i just don't have the time to maintain one.
