I Feel like i'm going crazy in all honesty. Is this appearing like this only for me or is like this for you all as well.

I posted on this thread: <https://hackforums.net/showthread.php?tid=5797140>

In the forum itself it shows that I am the last poster:

and when I look at who posted on the forum using the thread tools it shows that I have:

But when you actually go to the thread itself my post is missing.

Weird glitch I just figured id bring it up.

Yeah that was the weird thing. I'm assuming it might correct itself once someone posts after me maybe?

Its Hackforum-ception I am posting in the thread and not posting in the thread all at the same time!

The thread is just glitched. It will fix itself once someone else posts.

Shaddup Riyu we figured that out already lol

Yeah, this was an on-going issue with MyBB 1.6, not sure if it was fixed or not. I think this glitched out on larger threads (hence why Omni capped them off @ 2k posts I think?), so maybe with the upgrade this has began happening again. IDK, will have to see what he says.

Your post is there now. It's just a thread glitch.

I remember this used to happen on really BIG threads but that thread is brand new.

Yeah that's what I was saying. I think if it was closer to 2k this would happen a lot. Hopefully it doesn't continue, would be a big issue if newer threads were experiencing this.
