Thread: [Userscript / notification when quoted](#)

Shorta - February 10, 2018, 9:45 am

sooo.. I checked the list of userscripts but I couldn't find anything on this.
Has this been made? if not, why not?
thanks my fellow memburs.

Saltpeter - February 10, 2018, 9:50 am

HFX has user tagging which will send the quoted user a PM.

I'm assuming this only works if the new poster has HFX installed?

Renovatum - February 10, 2018, 10:55 am

Where can I find HFX? Sorry, I don't have much experience with userscripts but knowing when someone has quoted me would be useful AF

M?xim - February 10, 2018, 10:59 am

I have tried out some MyBB notification plugins, all are pretty much in bad shape. None that works with ease. Seems like the only option to have something official is to have one made.

Thanks! It sucks that it can only be done via PM, spamming the inbox a little bit, but it does the job.

Wait, so this makes ME send a PM to the one I quoted?

Ravioli - February 10, 2018, 3:19 pm

i remember reading something about this. iirc someone said you'd have to continuously load every page of every thread for this to work.
