bought it yesterday.

tried it today and it works great

Result:

0/42

and the seller is a very nice guy replies really fast and care for his customer.

only reason i bought from him because i saw his thread posts and he always replies to everyone of his customers problem unlike some other crypter sellers who dont reply for weeks..

very happy with the product.

Binding a jpg file doesn't mean the output is gonna be .jpg. It will just open your pic with tool you crypted.

I purchased this Crypter hoping for the best...

The price seemed great and it was listed as TOP SELLER. I purchased TOPHER and crypted a stub. Like most crypters people need to realize they all have updates and can't be fully undetected after being up and running for a while... Every stub I scan , I've made about 15+ with various different tools, every crypted stub gets about a 13/40 or 12/40 score never too , too good. This crypter in its current state can not bypass windows defender... no matter what cocaine says, the paid public build can not right now until updated...

These are just my opinions, the private stub will obviously be better but I've already purchased elsewhere.

P.S I do recommend purchasing the private stub as you will get a better detection ratio.

mkpubg - March 9, 2018, 11:32 am

@Cocaine, I never private messaged you at the time as I did not have enough posts to do so. Upon purchasing, you provide us with a text document that asks us to place our email and key here which I did... I also asked a question along with that which was voided. You should create a Skype ID or such to offer technical support to users who can not PM you.

Cheers.

Who can't PM me can post here asking to get contacted and I will send privately my skype address.

If you have any issue you really want to get solved then contact me on skype or with a private message, it's just impossible to handle your issues with a couple of posts.

As already stated any support request will be handled privately, posting here will result in getting ignored just for the fact I can't solve random shit with a few words.

I've purchased and my license key says invalid! I'd like a refund via bitcoin. I've made multiple threads in this forum thread and all you have to say is PM me when I can and could not at the time of making this post. I paid 30 dollars for this to work, not to have an invalid license key. You completely ignored my post, great customer service... Despicable.

(May 2, 2018 03:44 AM)andystone Wrote: [\[CITE\]](#) i like to know the runtime scan for this crypter? virus checkmate is basically scantime. does it bypass avs runtime?

Obviously it's not a scantime crypter, depends on your tools and environment and you can have great success for the actual price of the crypter subscription.

Don't expect to crypt random old crap with random settings and to bypass all the best antiviruses.

Also viruscheckmate is fucked up and couldn't have better scan than this. As soon as they put back online their antiviruses i'll come up with updated scans.

Sent you my skype address. I update the crypter weekly with the 3 stubs. The crypter will switch to a new stub each 48 hours.

I've sent my skype address to everyone who asked for it.

Bro, I wasn't at home in the weekend.

The scanner API is expired, I sent a PM to the owner of scanmybin to renew the subscription and since they still don't have an automated system to process the payments I'm still waiting for him to provide his payment details.

Can't you just be patient? I use it myself to scan the files so I know it is expired, everything gets fixed as soon as possible.

You can't spam my pm inbox, my thread, my skype every day. I know when we have a problem and we fix it when we have the chance to do it, no matter how much you spam us. It's an extremely cheap crypter for what it does and for the amount of stubs provided every single week.

i buy the crypter and got a lot of detection.

Chiesadisan - June 29, 2018, 4:22 pm

Did you read the instructions

RAT/Tool Settings :

1) Keep every settings disabled on your RAT/Tool (such as startup/install/protection etc)

Crypter Settings :

1) Enable STARTUP + PERSISTANCE (Always use a random and unique name as startup file name for each crypt)

2) After you have tested the file on your PC click "Clean system" on the crypter to clean your PC from the persistence.

1.) File Scanner isnt working > API error

2.) While testing the .exe on a VM always popup the > MSBuild.exe and RegASM.exe

3.) Detection 13/67

BTW: Need a privat stub. I cant PM you please mail me:

is this crypter compatible with sentinel keylogger ?
please pm me for other inquiry i need this crypter

mkpubg - August 10, 2018, 11:37 pm

Don't buy, my prior post was made ages ago, still no REFUND and NO UPDATE! How is this guy not banned yet, jesus... clear exit scam.

I wonder where his pal Monetized Liker is with all his/her snooty comments. Crying shame..

Badoosko - August 18, 2018, 1:05 pm

Hey i need a HWID reset please

donat2013 - August 20, 2018, 4:53 am

Hey, where is this guy? I like to buy but discouraged by these messages.
please guy respond, is this crypter dead?

EverliKillz - August 20, 2018, 6:55 am

For those shouting Scam Scam, don't you realize he is a human being, he might be ill, arrested or something bad might have happen to him
you have to learn to understand situations, you should contact seller before buying product or service to avoid all this kind of comment.

Just exercise patience, he is a High Quality Seller. I can vouch for his service, he knows his stuff, So why run??

Just keep checking back, he will definitely come back better
