Thread: [MacOS Sierra Theme for WinForms - Unfinished - Open Source](#)

gigajew - February 13, 2018, 4:53 pm

I was working on a MacOS Sierra theme for WinForms projects, but I couldn't find any consistent source of inspiration. All images on Google would look different. So I'm releasing the project unfinished in case anyone wants to add Close/Minimize/Maximize feature OnClick. I've added drop shadow support, rounded corners with transparency, resize support for borderless form. Etc.

Cool idea, I personally don't think this theme looks good on Windows but it's definitely interesting.

Which translucency effect are you referring to?
