Thread: [XRPBust.com New Provably Fair Ripple Bust Game](#)

ShitCoin - February 13, 2018, 9:56 pm

A New Provably Fair Social Gambling Game On The Ripple Blockchain.

Play Here [XRPBust.com](#)

== How to play ==

- 1.) Enter the amount of mXRP you want to bet (1 XRP = 100mXRP)
- 2.) Place your bet
- 3.) Cash out before the ticker busts or you lose that round !

Is The Game Fair ?

Absolutely! And we can prove it. Please see: <https://bitcointalk.org/index.php?topic=2943152.0> for technical details.

And see this JSfiddle to verify the games. <http://jsfiddle.net/3nve1d5o/embedded/result/dark/>

What is the house Edge ?

The house margin is scaled between 0 and 1 %, depending on how long you hold. An additional 1 % is effectively taken from every bet and put into the bonus pool, which is distributed in its entirety every game. As a consequence, skillless or random play has—at worst—an expected return of -2 %, but it is possible to overcome the house margin by skillfully getting bonuses.

You are using the bustabit files it's a direct copy how much funds do you have to back the site?

The max bet right now is currently 5 XRP or 500 mXRP, and the max profit per round is 150 XRP. I have 20,000 Ripple set aside for the bankroll but we launched with a bankroll of 5,000 XRP. When i see some results and make sure there are no bugs i will add the rest of the site bankroll and raise the Max bet/Max profit. Also yes we are using a v1 version of the bustabit source and just had it converted to the Ripple blockchain.

I seen the max bet later on for some reason it wasn't showing up for me but I tested the site out for a bit and the auto bet is broken it does nothing.

Yeah the AutoBet is bugged out and wont let you bet right now, We didn't notice until we launched the game server this afternoon. Only the manual bets are working right now and the Autobet will be fixed sometime tomorrow.

Looks good I'll come try it out when I have some Ripple.

Good luck with the site :)

No im not. I thought since there wasn't a XRP version of BaB anymore and its the second largest coin it would be good to make one.

Not a bad idea at all. Let's hope this stays legit

I'm interested to see how successful this will be for you. Good luck.

yoghiHD - February 15, 2018, 3:23 am

i would ask you something.

doesn't the owner of bustabit owns the right for the website?

did you read something according to laws?

Yes but the owner released a free version of the v1 source code because it had some vulnerabilities. I simply hired a developer to fix them and change the free source code to allow ripple deposits and withdrawals. We will be focusing on the legal aspect of things if things start to do well.

I tested this for a while and the site is ok for smaller bets has anyone actually cashed out a good amount yet?

OMERTA.666 - February 25, 2018, 8:42 pm

Havent used this yet but i will check it out soon. this owner of bustabit is a multimillionaire.. i wish you luck in your venture
