Hello,

No sorry there are no vouches left, but we are now for more than one year open and our servers won't get down. Only if we are maintenance the servers and this will be announce before we do this.

ocelot-solutions - February 22, 2018, 6:28 am

Now possible to install Linux desktop environment on your Virtual Private Server!

DoctorSheep Service Review for "Ocelot-Solutions" by "Ocelot-Solutions".

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your service.

First of all, I want to talk about Ocelot Solutions Sales Thread. The product itself is fascinating to observe. Based on the information the seller has provided to the customer has it all on the sales thread, between the necessary information, payment methods and different type of packages. Not much is required to have on the sales thread; the primary importance is the user website. I always believe a hosting service should have it own professional site, I see it as a requirement.

Payment Methods Accepted areCoinPayments

Paypal

Visa, MasterCard, American Express

Ideal

The Website

Second of all, The moment you click on the sales thread, it takes you to "https://ocelot-solutions.com," The moment you enter the site, you can already tell the amount of time and effort that was put into this service to be professional.

The features that are included in the service, the customer support that is available for all customers who need assistance with frequently asked questions, ticket support, and email. The site was very responsive, also tested it out on my iPhone 7 Plus and it was working well, everything was functional without having any difficulting in surfing the site on any mobile devices.

Everything on the site is divided equally between the tabs that show on the top right of the site.

The seller thread holds several information that a customer needs, many packages is included in the sellers thread and a lot more detailed on the actual website, including.Shared WebHosting Plans
Shared Virtual Private Server Plans

Dedicated Server Plans.

Now overall, everything is well with the service, my only concern is the longevity of the service, meaning how long they last. The problem with several hosting sites is they start their service in the

Marketplace then couple months later they are discontinued. Reasons why I tend to stick to official hosting pages that are not on Hackforums.

If you as the customer can sit down and tell me that your service is going to be a long-term investment that you plan on growing, then you will receive my blessings for that success. Although, I listen to the action than words. We will see how long your efforts come into play when providing this service in the Marketplace.

Final Thoughts

Your Sales Thread is your key to making your service successful. Be engaging with your customers, even if they have broad statement. Always reply back professionally and with patience. Even though your thread design is fine for now, see if you can get a better one done later on in your services, along with your signature.

If you're able to be a long-term service then you will be successful in what you are doing.

Restructure few things on the site, few elements are not centered(example: The features are not centered.)

Grammar check need to be established on the site on few pages.

Other than these, I approve this service.
