Thread: [VB.NET Chromium + CefSharp Notifcations?](#)

CodeBinary - February 15, 2018, 10:02 am

Say for example I have chromium loaded on a panel and had it loading web.skype.com/ you know how you get a notification when you get a message. Is there a way to check what the message was when it was sent with VB.Net Chromium?

My code:

```
Code Imports CefSharp.WinForms
Imports CefSharp
Imports Microsoft.Win32
```

```
Public Class Form1
Private WithEvents browser As ChromiumWebBrowser
```

```
Public Sub New()
InitializeComponent()
```

```
Dim settings As New CefSettings()
settings.CefCommandLineArgs.Add("enable-media-stream", "1")
settings.CachePath =
Environment.GetFolderPath(Environment.SpecialFolder.LocalApplicationData) + "\CEF"
CefSharp.Cef.Initialize(settings)
```

```
browser = New ChromiumWebBrowser("https://web.skype.com/") With {
.Dock = DockStyle.Fill
}
Panel1.Controls.Add(browser)
```

```
End Sub
End Class
```
