works is proud to present our first Freebie Friday. A lot of assets available online are of poor quality or lack versatility. Therefore, every Friday works will share assets curated by us that we feel will be useful to you. Note that these assets are not created by works, and thus you should always adhere to the original creators' terms of use. We will never knowingly leak private or paid content for free; our offerings are simply high-quality, free resources.

This week we're sharing three large, high-quality icon packs. These are intended for UI, web, and information design. Packs included are Sympletts, Nova, and Linecons.

Please request what you want works to share next week: would you like gradients? Fonts? Brushes? works will share whatever you feel would help you improve the most.

Glad to see this unofficial group is doing its best to contribute to the graphics community here on HF. I may not be a designer myself, but I do appreciate what you're doing. I'm gonna download it all the same to have a peak, thanks for the contribution!
