So yes those first numbers are what you get off per gallon for up to 20 gallons. One time use-

I personally use the \$4+ and use them 2 times because gas here is only \$2 and some cents.

And yes completely white hat -just unethical.

35-300 right now that are valid. Me and a few members are currently working out a private work around within shells system to still be able to create these codes. So far we've made a few dozen codes over the last few days that have been credited. But we've also seen shell start taking away some balance or maybe just a couple .25 cents but that's why I urge all seller to confirm balances for now on.

Ps don't get scammed from the other "shell" sellers.

TheMoneyGod - February 26, 2018, 7:36 pm

Dropped the prices!! But now!! Save on gas! All the codes on selly expire 2/28/18 and on March first I will update selly with the March stock!

Your main concern should be resolving this issue, not lowering your prices. And you could have at least replied to my PM for request of ETH back.
Instead you read it and ignored it.

A deal dispute can be resolved, this is just a sketchy situation and a decent amount of money at stake. Once I get working codes, or my money back I will close the dispute.

People are just mad because they buy a product that does not work and that this website has a lot of scammers. They just want to make sure that they are 1. getting refund or 2. they are getting what they paid for

I am in the same spot as other people, I hope you don't keep pushing the waiting time more and more because that would make people think you are a scammer. Not saying you are but longer it takes, the more people think you are a scammer

It's not sales trashing if I have a scam report open and I'm literally just telling the truth.

This could end in 1 of 2 possibilities

1. He actually is telling the truth about the shell thing
2. He is making up the issue just to get more people to buy so he can get more from an exit scam

I haven't made a single sale since last night. I'm not even trying to make more sales until this is fixed. If I was scamming I'd be done responding already and just leave all you hanging. I get everyone is upset but it hasn't even been 24 hours and I'm getting this resolved.

Also as many of your know the method was patched. These codes were made after this patch and that's where this error is coming from. That's why there wasn't an issue with my previous codes or other sellers because I was the only user that made codes after the last patch with a different method. So don't worry the balances will be fixed shortly.

If I was scamming I'd be done responding already and just leave all you hanging. I get everyone is upset but it hasn't even been 24 hours and I'm getting this resolved.

Also as many of your know the method was patched. These codes were made after this patch and that's where this error is coming from. That's why there wasn't an issue with my previous codes or other sellers because I was the only user that made codes after the last patch with a different method. So don't worry the balances will be fixed shortly.

Na bro give my funds back and don't ignore my PM you said it was already fixed. We ain't stupid here playing your little games.

Edit: Lmaoo this skid is a retard.

I never said you were scamming, I'm trying to keep a neutral position but just wanted everyone to know the possible outcomes. I don't want to be one of those people who keeps saying you're scamming then it somehow works in a day

Nah, this broke btch is scamming.

He can't even provide us proofs of screenshots from the balance he said it's showing on the website, but not at the pump.

I call BULLSHIT.

Why you keep lying?

This might give away a part of the new method but here.
Theres a balance of \$3.80 total \$3.75 from the method.
You can see that the balances were credited after the patch at the beginning of feb.

Also here is the output to create all the codes that I made.

Wtf kind of proofs is that? That is the history of the credited balance.

You can't even show us the actual balance, but show us the page history of the account.

You think people are that stupid?

Show us all the balance proofs for all the codes you sold to users on here.

Your excuses is pathetic dude. Stop with your constant lies.

National Security Agency - March 2, 2018, 8:03 am

Can you check it my balances are valid now?

Really don't want to go and look stupid when the codes have no balance.

Galaxias - March 2, 2018, 8:22 am

Don't know why you still have your selly.gg up still when your codes are not working and plenty of people are reporting as such. If I were to randomly guess, you're just pushing your attempt to defraud more users.

Benny Jamz - March 2, 2018, 9:00 am

Deal with extreme caution. Has 2 or 3 scam reports open.

™BlackPanther - March 2, 2018, 9:48 am

Well it was fun while it lasted sorry to those who may or have lost money. Never know he might come through. Always stay hopeful lol

Lmao RIP, lance is the goat. I shoulda just went with him.

War On Retail - March 2, 2018, 10:24 am

Method is patched RIP shell codes.

lance4182 - March 2, 2018, 10:35 am

I see people lost a lot of money in here.. Method is patched and I am not sure if there is any other method out there. Try not to get scammed next time. At least try to buy one first and see if it is legit.

Always, always do this. Don't know why people rush to buy a bunch of codes of anything from someone who has no previous dealings on here like that.

I also feel like the kid probably just bought my codes or yours and resold them here to look legit to

scam.

Extremely unfortunate for those who bought from this kid and got ripped off.

?ULL - March 2, 2018, 10:47 am

So, no more shell codes? No patched method? Damn, cars getting low on gas... :/
