Thread: [Bought My 8th Bike \(from arbitrage trading\)](#)

Warpig x64 - February 18, 2018, 3:54 am

I do arbitrage with crypto-currencies as my full time job, self employed alongside my partner and we essentially trade together all day every day.

We hope to register as an actual company and trade for people professionally, furthermore generating automatic income for said investor.

I am 17, and have just bought my 8th bike. It's an Aprilia RSV 1000 Mille, 1 of 3 in my country currently which is pretty neat.

Love it. Next step is another 1198 Ducati Panigale to be added to the collection. ?

Nice, what other bikes do you have?

I would love to get one but I will be able to drive it only in the summer and currently I don't think its worth it.

- 2006 GasGas 50cc SM bored to 100cc (was my learning to drive bike as I'm only 17)
- 1990 Yamaha FZR250R (first sport bike)
- 1990 Honda CBR250RR
- 2001 Suzuki GSXR750 Y
- 2017 Suzuki DRZ400SM
- 2016 Ducati 1198 Panigale
- 2007 Suzuki GSXR 1000 K7
- 2001 Aprilia RSV 1000 Mille (the one seen in this post)

I'll upload pictures of them all once I wake up. So much fun to play with, wheelies are definitely satisfying when holding balance point. :)

My advice, start with a 600cc. Only two I'd recommend is the R6 or a GSXR 600.

Aprilias Mille is definitely the gruntest v-twin you'll ever hear in person. As sad as it may sound absolutely shits on the VTR's, Ducati's, and any other v2 based motor out there, you name it. Silences every straight piped Harley it's come across, lol.

yoghiHD - February 18, 2018, 9:20 am

i am starting with a fz6 yamaha.

what do you think ?

i am now looking to make 2500€ to buy that bike and start my adventur

Limitless - February 18, 2018, 1:10 pm

I also have so many bikes.. 5, 2 dirtbikes , ktm exc 2018 and 450 2014,.... one supermotard, one suzuki gsxr 750, and one ktm duke ahah

I recommend you the GSX 650 F, good power, great feelings,very comfortable, it's a sport tourer, 250kmph max speed, and the motor is a rock, it can made like 200k kilometers with no problems

As your first bike, that's a good choice. Check out the MT-07 on YouTube if you've never heard or considered it, will probably change your opinion. Really nice bike, also 600cc, and having personally ridden my friends it's pretty powerful for its size.

Mines red with black wheels, just the stock colors. Hopefully when I have spare time on my hands I can get it custom painted some time.

Very nice bike...

Just bought a ninja zx-6r (636cc)

First bike and I love it!

I'm throwing my guess out there that's it's the 2006 model? Ive ridden my friends 2006 model and it felt no different to my gsxr 750, just a bit less power obviously. Good choice though of bike. It's my favorite era of the majority of bikes made (late 90's, early 00's), shame they don't produce many I4 engines anymore in comparison to the older bikes.

Not a problem. Once you purchase your bike make a thread about it. Wouldn't mind checking it out.

For sure, definitely no turning back after you own a liter. Every ride is amazing.

KooKlique - February 20, 2018, 10:04 am

Nice bro. What happened to taking pictures of the other 7 bikes like you said you were going to do? I enjoy riding myself and would love to see what you're working with

LuX98 - February 21, 2018, 5:01 am

Nice bike op! Can I ask how you got started doing what you do?

Thanks.

I taught myself funny enough. Found trades with a nice profit margin between platforms, and simply took them. Rinse and repeat. I also invest into ICO's and am a secondary marketer for an ICO as of today.

been interested in it but ive kept it at just trading.

Are you using a bot or just everything manually?

Everything is done manually, thankfully arbitrage requires nothing but knowledge. I've had a good 20-30 people pm me after this thread believe it or not asking the same thing.

I'll have to try create a video tomorrow and upload it to YouTube detailing how I do things, including spotting a trade, calculating all fees, wait times, figuring whether or not either market is volatile on either exchange etc. Should give anyone who watches it a strong understanding from how to spot a trade to fulfilling a trade and making profit.

Dope bike! Enjoy all the rides mate.

KooKlique - February 21, 2018, 10:28 am

So you're going to ignore the comment regarding the other 7 bikes and the pictures you said you were going to post in the morning? I see you replied to the other comments and blatantly ignored that one. I only asked to see the other 7 bikes because you said you were going to take pictures of them in the morning, and me myself I enjoy riding and would have loved to see the other 7 bikes you said you had. But not surprising, didn't really think you had 7 bikes tbh.. should of just bragged about the 1 bike in your op.

Congrats on the one bike that you did show, before anyone claims that I'm hating.

This is honestly great.

I have a few questions:

1) You bought them with your money?

2) You said you gonna upload a vid about what you do etc.etc. how can someone get into it

3) how much money did you start w

Insane! gl dude!

Warpig x64 - February 21, 2018, 6:26 pm

- 1) Yes.
- 2) Will do later on tonight.
- 3) \$600, exceeded 6 digits now.

Here's an update for all the people who have asked in the thread or messaged me. Instead of creating a free guide, I would much rather mentor people one-on-one via voice call and screenshare. My price won't be that costly, I will also offer essentially unlimited support when it comes to the learning aspect.
