Thread: [Paid or Free Java DRIVE BY or java RAT](#)

D.N.A - February 18, 2018, 5:41 am

Im looking for any Free or Paid Java DRIVE BY or java RAT ..

hint : Search forum Does not work :)

makachu - February 18, 2018, 5:49 am

JDB is dead lol. also java rats kinda suck. theres much better options

inyourmemory - February 18, 2018, 5:57 am

java rats have shit exec rate

Furiosa - February 18, 2018, 6:23 am

https://www.youtube.com/playlist?list=PLu1KJMXk6d6oVBU_hQBRMLEQ_n4YQweE8

here you have more rats you can choose one. unknown rat it's a java rat for example, you can see futures/setup and what its interesting for you.

D.N.A - February 18, 2018, 6:30 am

unknown rat is completely awesome with many platform but i really cant find any clean copy of it
you said java rat is shit exec rate ..

ok can you tell me how to remote websites Visitors when you have controlled more then 200 website ?

chickendad69 - February 18, 2018, 6:39 am

There is no such thing anymore... Chrome doesn't even support Java. You can still use Java with Chrome but 99% of the users does not have it enabled.

D.N.A - February 18, 2018, 6:49 am

thnks chickendad69

any another idea about how to inject c-panels with my server !!!

i was thinking about java inject but the most of you prevent this idea and i accept that

BitcoinCriminal - February 18, 2018, 7:42 am

java drive bys are outdated and not working anymore, your best bet is to spread manually, and java rats are garbage, unless youre trying to infect mac/linux..

CyberStrike - February 18, 2018, 8:53 am

OP only way it works is within corporate.. I still see maybe 1/2 my engagements they have Java and use IE.. for home users you may as well give up unless they specifically allow it and you have code signing certs then it's not worth it .

gulatisneha56 - February 6, 2019, 9:08 pm

Excellent topic. Great learning. Thank you for this share!

You have shell access to 200+ sites? if so then just send me a pm with your xmpp with otr enabled.

Im sure we can find a win win for us both ?
