Thread: [Real gains showing!](#)

DigitalFate - February 18, 2018, 10:34 am

So around a year and a half ago i put my money into cloud mining, i put roughly around \$140 in. Today, i can make around anywhere from 200-400 bucks a day depending on how the market is. Currently not reinvesting back into cloud mining because of bitcoins price right now. Mining btc, and when btc shoots back up i can reinvest right back in. Im willing to help individuals chase financial freedom for nothing in return. All i ask if that you some how invest into what i talk to you about you use my referral code so that way i can make some extra money on the side. I offered my service on other forums 5-6 months ago and results are just starting to pay of for those who listened to me! Please do not bash or shit on my thread, thank you.

Btw for those asking i kept on reinvesting for 190 days before i took a penny of profits. Till this day i dont take much profits.

Thats nice of you for helping others, but you posted this in the wrong section bud

Pandabear73 - February 5, 2024, 5:20 pm

Hey, Do you still have the ebook Vyrez sent you

Oppa - March 3, 2024, 9:35 am

thats the wrong section buddy , but amazing

Henry Chinaski - April 30, 2024, 12:23 am

yeah, whats wrong with this section?
