You do know theres a way to make a spam bot without using captcha service right?

Anyways, looks realmy good

**The Sanity** - February 18, 2018, 8:26 pm

By the way this is [xna81425](#), you can read [here for more but he's a scammer who exit-scammed](#) and is no doubt going to repeat the same thing again.

He sold a bunch of fake things and then deleted/wiped all his threads by editing them and then basically ignored everyone's PMs and posts until he was finally banned for it.

I'm 100% certain he is the same user based on his writing style, his posts, the area of botting he's involved in (Twitch), his coding ability and skillset, and everything else about him, no doubt in my mind whatsoever.

It all started when he [scammed someone for \\$400 here](#).

He tried to leave for a few weeks and come back and unfortunately that guy didn't keep up with his scam report and xna was able to scam a few more members before it was too much that he got banned for it. If that original victim was more outspoken about it I'm sure he would have been banned sooner, but anyway he's definitely the same guy and an absolute scumbag.

He's gained all his reputation by giving away free Twitch followers, typical method for someone on a multi-account to gain reputation on a new account after being banned, just do a giveaway and rake in the free reputation, just standard HF practice for ban evaders as most of you already know. On top of that, after I made the previous post on his sales thread (where he was selling this same bot for \$150.00, for source code btw), he did not address my post at all and after 10 days just bumped his thread saying he's still selling it.

Deal with caution.

Stop hating bro, by your logic anyone who gives out followers is a "SCAMMER".

**Galaxias** - February 18, 2018, 10:17 pm

I'll gladly test this out, let me know :)

**Rus3000es** - February 19, 2018, 1:40 am

19.2.18

Code \*\* Multiple Message Bot (Use X amount of accounts with X amount of messages, use your own timeout) -> Can be used for botting twitch channels

\*\* Saving option (Save the options that you selected for next program startup)

Any more ideas you guys have?

Already done.

Sent 2 vouch copies!

Waiting for feedback ;)

Looking to give more vouch copies! HQ members only.

**HCIM** - February 19, 2018, 3:59 am

Interested in this, always wanted to stream on twitch but never wanted to start at zero.

Wouldn't mind testing this out, get myself 5-10 fake viewers with generic post just to get the channel rolling.

I also support the usage of an external machine. (Just because it is an .EXE file) - Coded in java and converted into an exe by Launch4J.

You can also run it on:

is this the same guy who was selling the twitch lifetime service in discord you could type something like !twitchuser spammsg ? if so I wouldn't trust this bot... they have the same #'s after the message.

**Rus3000es** - February 19, 2018, 10:24 am

Beta testing has ended!

Thanks ;)

Yes his name is xna81425 and he scammed a number of people and ignored all PMs for weeks until he was finally banned. I already found his previous multi-account (PolishCoder) and its been closed already, and now this is his 3rd attempt in coming back and scamming.

<https://hackforums.net/showthread.php?tid=5703594>

There's his previous account & thread.

Notice how his previous account does the same strategy of all 3 of his accounts, which is to create a giveaway thread and giveaway a free hundred or so Twitch followers, gain some +reputation from the giveaway, and then he releases information about his "Twitch Bot" (or any bot really, he scammed with some HTTP or IRC bot last time too on his xna81425 account), then he scams afterwards and dips.

Expect a quick scam & ban from this user again.
