Jake???????????????? - February 18, 2018, 6:12 pm

i'll be getting on your account and solo boosting, ill be playing tracer only. my main account is 3993 right now, last season peaked at 4280 but i let it decay to 3800, then this season i placed at 3800 and decayed to 3200 but i should be GM by the end of the season if not top 500.

Also, this is only for people BELOW MASTERS. i will not boost you into my elo (gm) for free, i can't have trash on my team

let me know your elo and if you wanna go to diamond or something less! thanks :D, doing this for free for anybody <3

Yeah but she can close the distance easily and her passive and swing attack is pure cancer she can basically solo anyone champ with 250 health.
