Thread: [\[autopilot\] Money Youtube | Make 30\\$ A Day | Paypal Payout](#)

zekka - February 19, 2018, 3:33 am

Hello everyone! Today putting for you an excellent software for cheat views on YouTube and the first way to earnings. Later I will write a separate article with many ways to monetize this program! Drove!

Installation and configuration of software

First of all, download the software - Link in themes

Next, unpack the archive in a convenient folder for us

Start the Install.exe and install in any free folder

Then move with replacement the file from the Crack folder to the folder with the program installed.

Run!

Now the points in the software

As you can see, there is nothing complicated in the configuration. Also, to clarify that proxies to cheat do not need to buy. You can use any free proxy from Google

The software in the work shows itself in the best way, for the test launched a cheat on an empty video, in a few minutes 70 views

You can rotate up to 30 views from one proxy, and the number of proxies is unlimited. In theory, you can wind up and 100k views and a million. You will need only free proxies, which will not be difficult to find.

And sweetie, as promised, the first method of earnings with the help of this software. We will sell services cheat views on such sites as fiverr

(searching for customers will fit a variety of freelance marketplaces, SMM, forums, etc)

Such a service is in demand and well paid

As an example, I ordered cheat views 424 times (this is only on this site), for each order is received \$ 5

400 multiply by 5 get almost 2 thousand dollars, and if you connect at least all the freelance service, you can get 5-10 orders daily, and orders can be as 10 thousand views and 100 (and the payment, of course, is already higher)

That's it! Download and get your easy money) in the near future will write a few more ways to monetize the software.

All a good profit!

first, click on install.exe. thats where you went wrong

Exchange.Service - February 20, 2018, 3:35 am

I wonder if anyones actually going to dl that

worm3222 - February 20, 2018, 10:01 am

I like it pretty simple i will try it and update how good the software is and if its possible to make some \$ from this
